

DR. WACK
Premium Care

Product Information

The Problem:

Plastic materials bleach over time and become unsightly. Plastic materials lose their softening agents over time and become brittle. In addition, these materials bleach due to environmental impacts, like rain, snow and UV radiation. Conventional deep cleaners can restore a new look for a short time only, which often bears an unsightly greasy look. Furthermore, the result cannot be retained too long as the product is washed-off after the first car wash and/or extended ride in rainy weather.

The Solution:

**NEW
FORMULA**

PLASTIC Protectant Matt

Product Advantages:

Intensive color refreshment – Protection against aging/embrittlement – For indoors and outdoors

- Refreshes faded colors of plastic, rubber and vinyl parts
- Delivers brandnew surface look and ensures a high-quality matt finish without a greasy look
- Provides a longer-lasting effect compared to conventional products (especially resistant to rain, car washing, etc.)
- Deeply penetrates plastic material and renews it from within, thus preventing future bleaching and embrittlement
- Reduces reflections of the dashboard in the windscreen
- Also suited for matt plastic materials
- Offers UV protection, is solvent-free, has an antistatic effect and cleans slightly soiled surfaces
- Removes Polish as well as Wax residues

RECOMMENDED ACCESSORIES:

For perfect application:
A1 ALL in ONE Microfibre Cloth
Interior & Glass

Gentle and
streak-free for
all surfaces

Application Areas:

For all interior and exterior plastic, rubber, vinyl surfaces of vehicles

Application:

Shake bottle well before use. Ideally, dose the product onto an A1 ALL in ONE Microfibre Cloth Interior & Glass, a soft and absorbent cloth or a finepored sponge and apply evenly and sparingly on a clean, dry surface. Allow the product to react for about 5 minutes before rewiping with an A1 ALL in ONE Microfibre Cloth Interior & Glass. Do not use on glass, lacquer parts, tyre treads, or operating elements, such as steering wheels and pedals.

Recommendation:

- For a longer-lasting effect, repeat the treatment after approx. 30 Minutes
- A1 Plastic Protectant matt also removes residues from other polish and wax products on plastic parts such as bumpers easily.

Note: Do not use in direct sunlight or on hot surfaces. Store bottle in a frost-protected place.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
