

The Problem:

Persistent insect residuals, bee excrements

The Solution:

1:400 concentrate
sufficient for 200 ltrs.

Product Advantages:

Removes even insect remnants – Will not dissolve wax layer - Uses an active foam formula – Sufficient for 200 ltrs

- Removes any soil, such as street dirt, flower pollen and dirty residues without removing the existing wax layer
- Removes even stubborn insect residue and bird droppings quickly and efficiently
- Also suitable for convertible tops
- A1 Speed Shampoo is highly economic dosing 1:400
- Solvent-free – does not attack surfaces
- Detergent base according to the German Act on Detergents and Cleaning Agents materials are biodegradable
- All paint types (metallic and color paints) as well as paint conditions (from new to highly weathered)
- Optimal for matt paint, matt foils and glossy foils

Application Areas:

For pre-treatment before polishing and waxing and for regular car washing applications. For all lacquer types and lacquer conditions

Application:

For pre-treatment before polishing and waxing and for regular car washing applications. Shake the bottle well before use. Rinse away coarse dirt thoroughly with sufficient water. Fill the washing ball with A1 Speed Shampoo (25 ml suffice for 10 liters of washing solution), place the ball in a bucket and fill it with a strong water jet. Wash the car from top to bottom with a conventional car sponge. In case of strong soiling, foam the car thoroughly and let the foam react for a short time, before washing. Do not let the washing fluid dry in. Finally, wash from top to bottom. Rinse thoroughly with a soft water jet and rub of any residual water with a leather cloth.

Note: Do not use in direct sunlight or on hot paint. Store the bottle in a frost-protected place.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
