

The Problem:

Conventional microfiber cloths can cause scratches or leave clouds and streaks in paint care. They also feel scratchy and uncomfortable in our hands. Often the cloths have two different surfaces, making users unsure which side to use for which purpose.

The Solution:

Product Advantages:

For perfect application and a gloss finish – High-pile on both sides – 100 % scratch and streak free

The premium microfiber cloth made from particularly soft yarn through a high-end weaving process. For the perfect finish on paint surfaces. A1 THE CLOTH was identified out of more than 50 alternatives by Dr. Wack Application Technology!

- Ideal for gentle processing of polish and wax
- High-pile that is extremely soft and fluffy
- Especially high absorbency – leaves no streaks or clouding
- High pile on both sides – for extended use. Absolutely safe against incorrect use
- Seamless design by ultrasonic cutting for scratch-free buffing
- Lasts approx. 300 wash cycles
- Suitable even for sensitive finishes such as piano lacquer
- Very soft and pleasant feel

Application Areas:

For all car paints

Application:

Fold A1 THE CLOTH twice, lay it on the surface flat and wipe off polish or wax residues. If required, turn A1 THE CLOTH over or shake out product residues. Then use the clean side of the cloth to polish the surfaces to a high gloss.

Washing instructions:

- To develop the full effect of the microfibers, we recommend washing prior to first use
- Wash the A1 THE CLOTH separately or with laundry of the same color
- If you wash the A1 THE CLOTH with other fabrics, it is advisable to place it in a finely woven laundry bag

- Washable up to 60 °C
- Do not use fabric softener or bleach
- A1 THE CLOTH is suitable for tumble drying up to 60 °C.
- After drying, vigorously shake the cloth several times to fluff up the fibres.
- 85% polyester, 15% polyamide, 40 x 40 cm

Recommendation: Ideal in combination with our products A1 HIGH END Spray Wax, A1 Speed Polish, A1 Polish & Wax and A1 Speed Wax Plus 3.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
