

## The Problem:

Insect soil on the windscreen. Windscreens are often highly soiled with insect dirt in summer times. In particular insect bodies hitting the screen at high speed and drying on the surface, are extremely hard to remove.

## The Solution:

# INSECT REMOVER GEL

## Product Advantages:

### With Super-Gel formulation – Will not drip off, optimal absorption

- Removes even the most persistent soil through its Super-Gel formulation
- The CW1:100 Insect Remover Gel removes all insect residuals from windscreens completely and quickly
- Excellently suited for cleaning the front section of cars (such as engine hood, bumper, radiator grill, headlamps and plastic headlamp diffusers)
- Extremely efficient use, due to its non drip, highly absorbent. Guaranteed paint compatibility. Ideally suited as a pre-cleaner for car wash stations or cleaning on the go

## Application Areas:

### Front windscreen, head lamps and passenger car front sections

## Application:

Turn spray nozzle to spray position. Shake bottle well before use. Before driving through the car wash or before washing car by hand, spray the soiled surface (windshield, bonnet, radiator grille, bumper, headlights, exterior mirrors) with CW1:100 Insect Remover Gel and leave on for 3 - 5 min. to take effect. Support the cleaning procedure with a sponge, if required. Rinse thoroughly with water. Turn spray nozzle back to stop position (leakage protection). Guaranteed paint compatibility.

**Note:** Do not use in direct sunlight or on hot paint. When using on bare, unprotected aluminum, first spot-check the product on an insignificant spot to check compatibility.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
