

# Product Information

## The Problem:

For many customers, using wheel cleaners in ordinary spray bottles takes too much time and effort. They therefore rely on pressure sprayers. Modern wheel cleaners, such as the P21S Wheel cleaners, come in gel form. However, most pressure sprayers on the market are not able to spray a gel formula in a wide, user-friendly spray pattern. This leads to high consumption of the cleaner and is very time-consuming.

## The Solution:

# P21S<sup>®</sup> PRESSURE SPRAYER

## Product Advantages:

### Fast and effortless – For all P21S Wheel cleaners

- Professional quality
- Wide and user-friendly spray pattern
- Effortless spraying of all P21S Wheel Cleaners in seconds

## Application Areas:

### Ideal accessory for all P21S Wheel cleaners in refill containers

## Application:

Fill up to the MAX marking. Pump 15 - 20 times and then the P21S Pressure-Sprayer is ready for use.

**After use:** Nozzle with clear water.

**Note:** Do not store under pressure. Do not fill with solvent-containing or aggressive products e.g. break cleaner, cleaning solvent etc.

**Recommendation:** Ideal accessory for all P21S Wheel Cleaners in refill packs.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
