

## The Problem:

Weather and environmental impacts (UV radiation, oxygen, acid rain, road salt) cause tyres to fade and lose their gloss, i.e. their value and appearance.

## The Solution:

**P21S**  
**TYRE**  
**SHINE**

## Product Advantages:

### Permanent protection - Immediate gloss

- Provides immediate high gloss for faded tyres
- Offers permanent protection against weather and environmental impact
- Also protects the tyres from bleaching through UV exposure. Keeps your tyres smooth for an extended time
- Suited for used car treatment
- Thanks to the optimal active formula, the shine persists even after driving in the rain and cleaning in the car wash
- Efficient: One can suffices for around 20 tyres
- Spray can for easy and practical application

## Application Areas:

### Tyre walls

## Application:

Spray P21S Tyre Shine evenly on the clean (such as cleaned with A1 Speed Shampoo) and dry tyre from a distance of 10 - 15 cm. Wipe the wet tread or rim with a soft cloth, if required. Regular application increases the effect.

**Note:** Do not spray on tyre treads or brake discs/pads.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
