

# Product Information

## The Problem:

Motorbike chains are among the most important parts on a motorbike. Without proper lubrication, the forces acting on the drive chain lead to high metal abrasion (wear) between the chain and sprocket. However, on motorbikes up to 125 cm<sup>3</sup>, the forces acting on the entire drive train are noticeably lower than on higher powered motorbikes.

## The Solution:

**— SUB125 —**  
**CHAIN LUBE**

**NEW!**

## Product Advantages:

The chain spray has been specially developed to meet the specific requirements of motorbikes up to 125 cm<sup>3</sup> such as:

- Top wear protection and lubrication performance
- Extremely long-lasting lubrication
- Extended chain set mileage
- Excellent adhesion to the chain – almost no spinning off
- Very good wash-off resistance
- Top corrosion protection
- Suitable for all chain types (O/X/Z rings)

## Application Areas:

**For all chains from motorbikes up to 125 cm<sup>3</sup>**

## Application:

Shake can before use. Spray the chain spray sparingly and evenly on the inside of the dry, clean chain. Allow the product to set for at least one hour (ideally overnight). The chain should be cleaned with S100 Chain Cleaner after no more than three lubrications.

## Tip:

Use S100 chain spray splash guard for a clean chain environment.
