

DR. WACK

Premium Care

Product Information

The Problem:

Contamination / dirt on the motorcycle can cause scratches during the shampoo wash (hand wash). We recommend using the S100 Power Bike Shampoo as a pre-cleaner with a foam sprayer or foam lance and for subsequent hand wash as a shampoo.

The Solution:

POWER BIKE SHAMPOO

NEW

Product Advantages:

NEW FOAM TECHNOLOGY: Dynamic changes to the foam bubbles ensure a micro-mechanical cleaning effect!

This loosens the dirt from the surface actively, binds it to the foam and removes it from the surface.

- Extremely powerful cleaning performance
- Very gentle on all surfaces
- Does not remove wax and sealing coats

Application video:

Application Areas:

Suitable for all surfaces

Application:

Rinse coarse dirt off with a large amount of water.

- **Using the foam hose (pressure washer):** Fill the product into the tank undiluted.
- **Using the foam sprayer:** Add 1.5 to 2 caps (one cap = 30 ml) to 1 L water. Apply the foam to the motorcycle and wait 2 to 3 minutes for it to take effect. Then rinse thoroughly with clean water.
- **Using as a shampoo (hand wash):** Place 2 to 3 caps to a bucket and add 5 L water to foam it up. Wash the motorbike from top to bottom with S100 The Wash Mitt – Premium microfibre or S100 The Sponge – Premium microfibre. Then rinse thoroughly with clean water and dry the vehicle. Tip: The two-bucket method is ideal for gentle hand washing. One bucket with clean water and the second filled with water including a suitable cleaning agent.

RECOMMENDATION:

S100 THE WASH MITT
Premium Microfibre

S100 THE SPONGE
Premium Microfibre
