

DR. WACK
Made in Germany

Product-Information

The Problem:

Impacts like street dust, hairspray and sweat residuals leave an unpleasant odour in the helmet and form an unhygienic dirt layer.

The Solution:

HELMET LINING CLEANER

Product Advantages:

Enables a thorough cleaning of the helmet cushion and removes unpleasant odours

Issue 22/2013

- Removes all soiling carefully and effectively
- Removes unpleasant odour and provides a fresh fragrance
- Allows for an easy and targeted application
- Kills bacteria

Applications:

Suited for all helmet cushions

How to apply:

Shake the can before use and spray on the soiled areas. Clean thoroughly with a damp sponge or a lint-free terry cloth. Wash out the sponge or cloth in between.

In case of persistent soiling, let react for up to five minutes. Wipe the treated surfaces with a clean and dry cloth. Repeat the process, if required.

Note: Do not use on coated inner visor surfaces. Protect these surfaces from any contact with the cleaner.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
