

STB™

Stop The Burn

STB, Stop The Burn, is a conditioning agent that alleviates the hair and scalp from the effects of harsh chemical processes. The active ingredient is menthol which provides a soothing sensation that helps relieve irritation.

- Prevents chemical burns, itching, scalp damage with all color & perms
- Can be mixed into color/lightener formula, perm lotion or relaxer or applied directly from bottle to scalp
- Will not affect the processing action of any chemical services

DIRECTIONS:

Add 20 drops of STB to color, bleach/lightener mixture or 5 drops to perm solution. STB can also be applied directly to sensitive areas to eliminate irritation

AVAILABLE SIZES: 2 fl oz (59 ml)

PREVENTS
SKIN & SCALP
IRRITATION

CASE STUDIES

Chuck, a stylist for years, noticed that more and more of his color clients ask for a tail comb to scratch their itchy heads. He wished there was a safer and more professional way to handle the challenge. Wish granted - POWERTOOLS STB put into the color and/or applied directly from bottle to the problem area will eliminate the itching.

Rose always complains about her color itching and burning, aggravating her scalp and her stylist. Her stylist wishes that she would go to someone else! It's not Rose's fault. The solution is to add STB to her color mixture. Happy client, happy stylist!

Josephine loves to do perms. To avoid any problems with the perm lotion irritating the clients' skin, she applies STB directly to the hairline before placing the cotton around the client.
