

CLEAN + CARE®

JEWELRY CARE

REVITALIZING SET

IDEAL FOR CUSTOMERS NEW TO JEWELRY CARE

2 PRODUCTS FOR ESSENTIAL CARE

EASY WAY TO CLEAN JEWELRY

KEEPS JEWELRY SPARKLING

HOW IT WORKS

This pre-assembled kit is a great add-on product to any purchase within your store and a perfect introduction for those who are new to jewelry care. As you soak the jewelry, the surfactants in the formula work to lift away grime, germs + oils that can dull jewelry's sparkle.

PERFECT FOR: Most types of metals + gemstones.
Soaking strands of Pearls can weaken the silk.

WHY PROFESSIONAL JEWELRY CARE

Clean + Care® products are specifically formulated for the safe and effective care of gemstones and metals. Using boiling water, toothpaste, or other TikTok hacks run the risk of damage and are not designed with jewelry in mind.

TWO-STEP PROCESS

STEP 1
CLEANSE

Soak in cleanser for two minutes. Use the brush to clean. Rinse jewelry carefully and blot dry. Repeat if needed.

STEP 2
POLISH

Finish with a few rubs of the Jewelry + Watch Polishing Cloth to remove tarnish and add a finishing shine.
