PRODUCT MAINTENANCE

As the bathroom can be a high use zone in the house, it is important to understand how to maintain products. Below are our suggestions on how to clean and care for them.

SHOWER CARE

- Wipe down the shower or use a plastic squeegee to remove excess water from the glass after use
- Use a trusted glass cleaner on shower glass. If your glass has been treated with Diamond Fusion, please go to <https://www.diamondfusion.co.nz/product-instructions/> for cleaning instructions
- Use Vibrance Surface Cleaner to clean the tray and wall liner
- Waste lid and cup should be removed and cleaned regularly
- Drips seals can be removed for cleaning and can simply be replaced when they no longer look their best

VANITY / BASIN / STORAGE TOWER / MIRROR CARE

- Wipe any spilled liquids from the vanity as soon as possible. Cabinets are water resistant not waterproof
- **Thermoform, Ultra Gloss, Ultra Matt, Exochique Cabinet Finishes:** only use a damp cloth to clean
- **Woodgrain and Standard Melamine Cabinet Finishes:** for best results use Vibrance Surface Cleaner or a gentle streak free glass cleaner using a soft cloth
- **Stone Bench Tops:** only use a damp cloth to clean
- **Acrylic, Composite, Vitreous China and Solid Surface Vanity Tops and Basins:** use Vibrance Surface Cleaner. Light scratches can be removed from an Acrylic or Composite vanity top by using 'Brasso' or 1200 grit 'wet & dry' sandpaper, followed by polishing with a fine car cutting compound. For deep scratches, we recommend an experienced Acrylic Repairer is contacted
- **Glass and Mirrors:** for best results we recommend the use of a trusted glass cleaner

BATH CARE

- Clean regularly with warm, soapy water using a non abrasive cleaner.
- Light scratches can be removed from an Acrylic bath by using 'Brasso' or 1200 grit 'wet & dry' sandpaper, followed by polishing with a fine car cutting compound. For deep scratches, we recommend an experienced Acrylic Repairer is contacted.

VIBRANCE SURFACE POLISH AND CLEANER

Suitable for use on Acrylic, Vitreous China, Porcelain, Tiled and Solid Surfaces

Step 1: use ShowerMaster Vibrance Surface Cleaner for daily cleaning

Step 2: use ShowerMaster Vibrance Surface Polish to restore lustre, remove light scuff marks and leave a protective film

Developed and manufactured in New Zealand specifically for Clearlite and Athena bathroomware.

Note: Before using on other products it should be tested on an inconspicuous area.

We are here to help. If you would like further information on your Clearlite or Athena product or additional cleaning instructions, please contact our After Sales team; **P**; 09 444 3780 | **E**: aftersales@clearlite.co.nz
