

Ring Size Guide

Find out your ring size once and for all with our detailed guide and cut out ring sizer below.

Print this guide out at 100% on A4 to ensure accuracy. Check the printout

is accurate by measuring the below line, it should be 25mm.

Method 1: Measure an existing ring

Place your ring on the circle chart below and match the inside edge of the ring to the

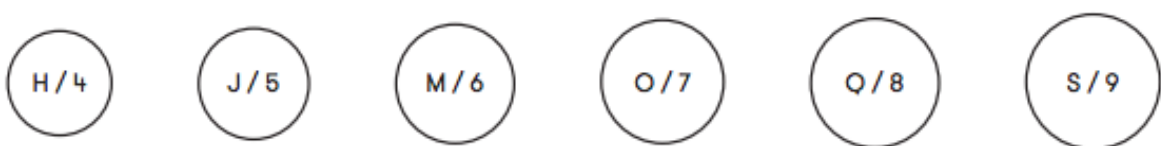

closest size on the chart.

The letter, number combination inside the circle is the size of that ring.

Make sure to check

different ring sizes for different fingers, as each finger may have a different size. If your

ring falls in between two sizes, always go for the larger size.

Method 2: Measure your finger

Cut out our ring sizer below and create a slit where the orange line is.

Wrap the sizer

around your finger and slip the pointed end through the slit. We recommend taping it

where it feels comfortable and testing sliding it on and off your finger.

If it sits in between two sizes, again we would suggest going for the larger size.
