

# SUPERBASE™ ANCHOR

## SuperBase™ Anchor 65-10

The SuperBase™ Anchor developed with the team at ArborMaster® Outfitters is an adjustable Basal / Base anchor that is used for anchoring an Arborist's climbing line at the base of the tree and may be set up in multiple configurations. Constructed from  $\frac{7}{16}$ " rope with 6" stitched pockets for an easy and safe connection. Setting up the anchor at the base of the tree also allows the climber to rig for rescue, allowing for a ground-based rescue in the event of an emergency.

### Applications:

- Works well with a Port-A-Wraps or other friction-brake lowering devices.
- SRT Climbing.
- Rescue – ground-based.

### Features:

- 16 stitched pockets total that allows the user to maximize adjustability.
- Compatible with a figure 8 on a bite stopper knot and spliced eye capture configurations.
- Multiple Belay configurations including knot pass-through options.
- Extremely versatile tool with endless options as a Basal Anchor system.
