

Stay Intelligent, Stay Focused

Yealink UVC86 supports Presenter Tracking, Speaker Tracking and Auto Framing features, ensuring people always be tracked and be seen within the field of view. Remote participants can be focused and engaged in the meeting itself.

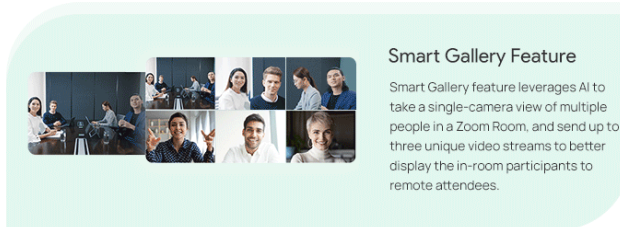

Be Native, Be Collaborative

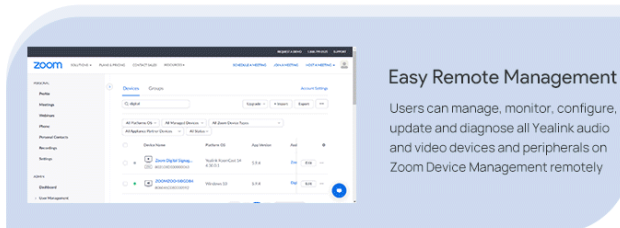

Native Zoom Experience

With the ZVC860 Zoom Rooms System, users can enjoy an immersive native Zoom meetings in large rooms.

Smart Gallery Feature

Smart Gallery feature leverages AI to take a single-camera view of multiple people in a Zoom Room, and send up to three unique video streams to better display the in-room participants to remote attendees.

Easy Remote Management

Users can manage, monitor, configure, update and diagnose all Yealink audio and video devices and peripherals on Zoom Device Management remotely.

Be Flexible, Be Scalable

Flexible Audio Options

Users can choose Yealink voice devices or audio solution from the mainstream third-party providers including Shure and Blamp. Connect Yealink MCore to DPS with a simple USB connection, unlocking the perfect audio and video.

Works Well with Other Platforms

Not only certified with Zoom, but also support BYOD feature for any platforms. Start meetings anywhere you want with dedicated devices.
