WATERLESS NANO WASH & WAX

High Performance Nano WATERLESS Multi-Surface WASH & WAX

The All-in-One Cleaner and Hydrophobic Nano Coating

NanoTech Waterless Wash & Wax is easy to use. Its revolutionary cleaning technology allows you to clean and wax any surface in one go, while needing no water at all. Works very well for all types of vehicles, planes, boats, trucks and even trains.

NanoTech Waterless Wash & Wax contains special nano particle lubricants and -cleaning agents that work together to lift and surround (emulsify) dirt or foreign articles. This allows one to safely wipe the surface clean, without any fear for harming the surface. A residual hydrophobic nano-matrix layer is formed on the surface which is also highly celebrated for its high shine properties.

Technical Data Sheet

PROPERTIES:

- Wash and Wax
- Hydrophobic nano matrix
- Window Cleaner / Repels rain
- Removes bugs, tar, tree sap...
- Headlight restorer
- Wheel and Rim Cleaner
- Light scratch and scuff mark remover.
- Shine plastic and rubber trims
- And a myriad household & other uses

Instructions:

1. Shake well before use and do not apply indirect sunlight.
2. Best results if applied in small sections.
3. From 20-30cm, spray a light layer onto surface for cleaning of moderate dirt and leave to soak for 2-3 minutes. On stubborn stains, allow to soak 5-7 minutes.
4. Use a terry cloth (towel material) to gently rub the Waterless Wash & Wax in circular motions to remove dirt and leave a waxy haze. In cooler temperatures, the wax haze may take longer to appear.

With a dry and clean microfiber cloth, buff the nano-wax haze to bring out a brilliant shine.

The shiny and protective waxy nano-finish lasts and protects the surface up to 30 days.
