This is a supplement for the eBook *“Fretboard Visualization – A Thought Process & Mode Theory for Bass Guitar”*.

Each link goes to a video that is relevant to the exercises on the corresponding pages. The video could be a visual representation of how to play the exercise or a backing track to play along with the exercise.

I did not include this page in the book because I anticipate it will be an evolving document that will get updated as new videos are made and/or video links change. Please visit fretboardvisualization.com for updates.
