

ProGlo[®] Extension Cords With "CGM"

Amber light indicates power in the outlet.

Stress collar prevents cord from pulling out.

Nylon Premold prevents ground pin and blades from pulling out.

Green light indicates continuous grounding.

ProGlo®

Where The Priority Is On Safety And Performance

Our Pro Glo® Products Program

When you purchase the best quality extension cords, we include the following benefits which are part of our Pro Glo® Products Program.

Clear lighted ends that indicate power is running from the power source through the cord.

Our patented (CGM) Continuous Ground Monitoring connector displays a green neon light that indicates the extension cords' electrical current is safely grounded.

Choose from a variety of safety colors to help track your cords, prevent job site theft, and create visual safety underfoot.

At the factory, we will Custom Print your company name and additional information down the length of your extension cords upon request.
