

KING Jack™/KING OmniPro™ Mounting Plate

Mounting Plate for KING Jack/ Omni Over-the-Air TV Antennas

Introducing the NEW KING OTA Antenna Mounting Plate. Covers all screw holes left by the old antenna for a watertight seal. Durable ABS plastic is weather-resistant and UV-protected. Holes drilled for easy installation. Attaches to base of KING Jack & OmniPro antenna with included hardware. The MB8200 mounting plate will work in all replacement applications where the hole pattern for the removed over-the-air antenna is 11" square or less. Made in the USA.

- Pre-drilled for easy installation
- Engineered to provide a water-tight seal
- Manufactured with a weather-resistant, automotive-grade plastic
- UV-protection ensures durability
- For use with KING Jack HDTV over-the-air antennas with mount (Compatible KING Antenna Models: OA8500 series, OA8400 series & OA1000 series)

KING Security Alarm

Security Alarm for Portable Satellite TV Antennas

The KING AL1000 is an Anti-theft alarm for KING portable Satellite TV Antennas.* Provides peace of mind when you protect your KING antenna with this custom designed alarm. Using the included coax jumper cable, simply connect the AL1000 in-between your satellite receiver and the coax cable coming from your KING satellite antenna. The built-in alarm will quickly alert you if the antenna is disconnected. Use indoors, directly behind your satellite receiver. Powered over the coax cable. No additional connections are needed.

- Anti-theft alarm for KING portable satellite TV antennas
- Installs easily with included coax jumper cable
- Inserts between antenna and receiver, indoors
- Powered over the coax; no additional connections needed
- Emits shrill noise if antenna is disconnected
