Introducing the KING Truck Cab Mount Bracket. This bracket is for permanent installation of your KING satellite antenna* on long haul trucks. This KING cab mount bracket features built-in vibration isolation for heavy-duty long haul truck applications. Made in the USA.

- Mounts antenna to rear of cab
- Permanent installation
- Built-in, multi-axis vibration isolation
- Rust-resistant and durable
- Easily painted to match truck color

KING Jack™ with Mount

Directional HDTV Antenna

Introducing the NEW and Improved KING Jack! Better signal, updated sleek design, easy to use. Hi-tech yet simple design. KING Jack digital HDTV antenna with mount provides greater performance than expected from such a compact over-the-air TV antenna. KING Jack is designed for long range signal acquisition, ease of use, strong performance, and durability, making it the perfect choice for the demands of an RV. This directional antenna is positioned using the included interior antenna rotation knob and has a full 360 degrees of rotation allowing you to easily find TV towers. Enjoy free digital HDTV wherever life takes you.

- Long-range signal acquisition (get more channels!)
- Amplified, ultra-high gain antenna
- Upgraded technology enhances UHF signal reception while still receiving remaining VHF broadcast channels
- Broader reception coverage quickly locates strongest signal and maximizes reception
- Compact, aerodynamic design maximizes wind resistance and is up to 70 percent smaller than traditional RV antennas
- Always ready for travel –no need to crank up or down
