

Aircraft Seating

Comfort-Performance-Design

Aircraft Seating

LifePort's custom divan and seating product line uses technology to achieve an industry-leading level of comfort, safety, quality, and durability. With products ranging from slouching or bunking divans, to fully articulating beds and dynamic seats, LifePort is the choice for both Head of State and VIP aircraft programs worldwide. LifePort's extensive product catalog ranges from multi-axis 21G slide and swivel seats to single-place dynamic seating modules that can be grouped together to form unique configurations.
