

# TRIPLE LITTER STACKING SYSTEM

Medical Interior

# Stacking Litter Systems

## (Two or Three Platforms)

### Specifications and Capabilities

- Total system weighs less than 115 lbs (52 kg)
- System can be utilized in conjunction with any transport stretcher type (NATO or Talon litters, stokes basket, backboard, etc.) – or no stretcher at all (walk-on patients)
- Requires no bulkhead attachments
- Litter support decks manufactured out of machined aluminum or aluminum honeycomb composite depending on customer mission requirements
- Installation adjustable in 1" (2.54 cm) increments, forward and aft
- Optional Provisions Deck available to enable secure attachment of medical devices and equipment

### Optional Provisions Deck Highlights

- Rated for 160 lbs (72.57 kg)
- Expands baseline stretcher system to include advanced life support capabilities
- Compatible with approved TLSS
- Accessory options include:
  - Oxygen containment shroud
  - Compressed air/vacuum system
  - Medical device mounts
  - Storage options
  - Total deck weight 21.5 lbs (9.25 kg)

## ADVANTAGES

- Engineered beyond specifications and capabilities of systems currently available
- Offers operational flexibility never before possible for large aircraft operators
- Capable of flying medical patients regardless of transport litter type
- Utilized in large (Part 29) helicopters and transport category (Part 25) aircraft
- Palletized with 463L pallets or attached directly to aircraft's existing seat track
- Installation does not require tools and can be accomplished in under 10 minutes
- TSO C 39B

## TLSS LIGHTING SYSTEM

- Easy installation (without tools)
- Re-chargeable battery supply
- Two (2) quick release auxiliary swivel goose neck lights
- NVG-compatible
