Lightweight Ballistic Protection

LifePort specializes in the design, qualification, certification and integration of the lightest ballistic protection systems available. When combined with our patented composite encapsulation technology, our products are the most durable and lightweight solution available.

The Best Solution for Your Mission

- Optimized performance using the latest ballistic materials
- Industry leading durability using composite encapsulation
- Fully qualified to MIL-STD-810
- Select an off the shelf ballistic solutions or allow LifePort to customize for your mission
- Off the shelf solutions include NIJ Level IIIA, III and IV, 7.62 x 39 · PS Ball, 7.62 x 54R Type LPS and 7.62 APM2
- Tested at our state of the art on-site ballistic test facility
- Passes 12-second and 60-second vertical burn testing; complies with FAR 29.853

Customized for your Mission Requirements

Our wide array of materials and composite encapsulation options allow customers to select characteristics most important to their mission. LifePort can tailor the product based on area of installation, foot traffic, cargo, mission equipment and mission profile, to provide the lightest weight solution possible.

Level 1

Cockpit/Light Foot Traffic

Level 2

Heavy Foot Traffic

Level 3

Cargo Floor/Heavy Equipment
