Maritime Lightweight Ballistic Protection

LifePort's advanced ballistic protection systems increase operational vessel performance and mission flexibility.

In today's world, ensuring the safety and security of maritime vessels has become an essential aspect of protecting international commerce, global transport, and coastal security. Designed to withstand various ballistic threats and tolerate harsh marine environments, our systems are purpose-built using advanced armor manufacturing technologies to provide the highest level of protection and durability. We understand the importance of protecting personnel and vessels from potential attacks. Our team of experts work diligently to design and manufacture customized solutions for various applications

- NIJ level III, NIJ level IV, STANAG 1 solutions available
- Utilizes the highest performance polyethylene (HPPE), ceramic, and metallic materials to provide a thin and lightweight product which is highly durable in extreme conditions
- Provided with a patented fiberglass composite wrap
- Options for over the floor, bulkhead, and underfloor armor systems
- Straightforward installation and removal optimized for the rigors of real world operations
- Qualified to MIL-STD_810G
