This document contains no technical data subject to the EAR or the ITAR

MEDFLOOR FEATURES

- Unique one-piece construction provides a seamless, sealed covering that is custom formed to the aircraft floor
- UV, industrial cleaner and solvent resistant
- Exceeds Mil-Std-810 prohibiting the growth of fungus and mold
- Complies with FAR 25.853 12- and 60-second vertical burn testing
- Fluid dams and barriers can be integrated into the coating to provide additional protection from fluid intrusion
- Impact resistant
- Currently available in Gray or Black
- Available for cockpit, cabin, or vertical applications
