Safety warnings

Please keep these instructions safe.

It is necessary to pay attention to these warnings in order to avoid the risk of personal injury and damage to the appliance.

Do not use the appliance if it is damaged in any way. At the first sign of defects or unusual noises or smells, turn off the appliance and unplug it. In such cases contact an Authorized Service Center.

Only use the appliance if the power cord is intact. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard. Danger of electric shocks. Do not leave the power cord near hot surfaces, sharp edges or other sharp objects. When disconnecting the appliance, pull on the plug, not the cord; otherwise it may be damaged.

Only connect the appliance to power outlets complying with the requirements of law. Make sure that the power supply voltage matches the rating shown on the data plate on the bottom of the appliance.

To avoid the risk of fire, set the appliance on a flat, heat-resistant surface. Only use and store the appliance indoors.

Do not let the power cord dangle! Position the cord so there is no risk of tripping.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the appliance.

Always close the lever. Never open the lever while the appliance is operating. Always use the appliance with the drip tray and grill in place.
Safety warnings

Use only CBTL® Capsules.
Never use warm or hot water to fill the water tank.
Use cold or room temperature water only.

Never place your hands inside the capsule compartment. Danger of injury! Never remove parts of the appliance. Do not insert objects into the openings. This could cause electric shocks! Any operation that is not described in this instruction manual should only be performed by an Authorized Service Center!

Clean the appliance carefully and regularly. If it is not cleaned, the build-up that forms may be hazardous to your health. Unplug the appliance and allow it to cool before cleaning.

Rinse and descale machine regularly. See pages 10-12 for instructions. If you do not, the appliance may be damaged and may become harmful to your health.

Make sure the electrical elements, plug and cord are dry.
Never submerge the appliance in water. Protect the appliance from sprays and drips. Water and electricity together constitute a risk of electrocution.

If you do not expect to use the appliance for a long period of time (leaving on vacation, etc.), unplug it.

Instructions for use and disposal

The appliance has been manufactured using high quality materials that can be reused or recycled. Dispose of the appliance in a suitable waste collection center.

This appliance is intended to be used in household and similar applications such as:
– staff kitchen areas in shops, offices and other working environments;
– farm houses;
– by clients in hotels, motels and other residential type environments;
– bed and breakfast type environments.

When you decide to dispose of the appliance, unplug it from the power outlet. Then cut off the power cord as close to the body of the appliance as possible.
Safety and Indicator Symbols

**CAUTION**
This is a safety warning symbol used to call your attention to possible risks of personal injury.

**NOTE**
This symbol is used to highlight some actions that will optimize use of the appliance.

Dishwasher safe.

Not dishwasher safe.

This symbol is used to indicate a **WHITE** light.

This symbol is used to indicate a **RED** light.

This symbol is used to indicate a **YELLOW** light.

This symbol is used to indicate a **BLUE** light.
Lieto Overview

*Espresso capsules should only be brewed on short and long buttons

"Long espresso/tea latte" warning light
"Short espresso" warning light
"Brew coffee or tea" warning light
"Multifunction" warning light
"Dispensing" button

Water tank lid
Water tank
Base for water filter (in the tank)
Power cord
Main switch
Capsule compartment
Lever for opening capsule compartment
Knob
Dispensing spout
Used capsule container
Drip tray grill
Drip tray
Drip tray
Plug the power cord supplied into the relevant socket at the bottom of the machine.

Fit the capsule drawer into the drip tray and slot them into the machine.

Fill the tank with cold or room temperature filtered water (not carbonated).

Make sure the lever is closed.

Plug in and switch on the machine.

Along with the beverage warning lights, the multifunction warning light blinks alternately in RED.

Place a large container (at least 8 oz.) under the dispensing spout.

Press the dispensing button. Wait for the machine to complete the water filling cycle.

When the beverage warning lights and multifunction warning light blink simultaneously, the machine is warming up.

When one of the beverage warning lights and the multifunction warning light come on and remain lit steadily, the machine is ready.

Turn the knob until the brew coffee warning light comes on. Press the dispensing button again to carry out a rinse cycle. Wait for the machine to complete the rinse cycle.

At the end of this operation, empty out the water from the used capsule drawer.

NOTE:
If, at the end of the water filling cycle (see step #8), the multifunction warning light continues to blink in RED, repeat step 8.
Preparation of your beverage:

1. Raise the lever to open the capsule compartment.
2. Insert the capsule, pressing it gently into place.
3. Fully close the lever.
4. Place a cup or mug under the dispensing spout.
5. Turn the knob to select your preferred beverage.
6. Espresso capsules should only be brewed on short and long buttons.
7. Press and release the *dispensing* button. A beep will sound.
8. The selected warning light blinks while the *multifunction* warning light comes on steadily. Dispensing stops when the programmed amount is reached.
9. Raise the lever to eject the used capsule into the container.
10. Close the lever.

**NOTE:**
Capsule container can hold around 8-10 capsules. We recommend emptying and hand washing container weekly.
3 Adjusting for different cup sizes

1. The machine is initially set for the use of larger cups.

2. For the best possible results when using smaller cups, raise the drip tray, expand the bottom part and fix it in place by turning it clockwise.

3. Reposition the drip tray and place smaller cup on top.

4 Daily maintenance

1. Remove the drip tray and used capsule drawer.

2. Lift out the used capsule drawer; empty and rinse it.

3. Remove the grill. Empty the drip tray and rinse it out with water.

4. Remove the water tank; empty and rinse it.

Use a soft cloth and a mild soap to clean surfaces of the appliance.
Do not use jets of water to clean the appliance.

The plastic parts of the machine are NOT dishwasher safe.

NOTE:
Traces of the product may remain in the circuit of the machine. Rinsing is carried out by pressing the dispensing button without inserting a capsule. We would advise you to carry out this procedure at least once a week in any case.
Descaling signal: when the “multifunction” warning light blinks in YELLOW every 5 seconds, a descaling cycle should be carried out, as illustrated below.

The warning light will only stop blinking yellow once the descaling cycle is complete.

It is advisable to use the CBTL® System descaling agent. It has been designed to comply with the technical characteristics of the machine, in full observance of consumer safety. The descaling agent must be disposed of in compliance with manufacturer instructions and/or with current regulations in force in the country where the appliance is used.

CAREFULLY read the directions for use on the package of the descaling agent. Avoid contact with eyes, skin and machine surfaces. During descaling do not turn the machine off and do not raise the lever. A person must always be present during the operation.

Do not use vinegar: it could damage your machine!

1. Switch machine off by pressing the on/off switch.
2. Empty and rinse out the used capsule drawer and drip tray.
3. Remove and empty the water tank.
4. Mix the contents of a pack of CBTL® System descaler with approximately 1 litre of water and pour into the tank.
5. Make sure the lever is lowered and there is no capsule inside the capsule compartment.
6. Remove the drip tray.
7. Place a container (at least 16 oz.) under the dispensing spout.
8. Turn the knob all the way to the left (counterclockwise).
Press the *dispensing* button and at the same time turn the machine on by pressing the on/off switch.

The machine beeps twice and the *multifunction* warning light comes on steadily in **WHITE**. Press the *dispensing* button to start the descaling cycle.

The appliance dispenses the descaler at intervals (5 doses with a 4-minute pause between each one, for a total duration of about 25 minutes). During this phase, the *dispensing* button and the knob must **NOT** be touched, the *multifunction* warning light blinks in **YELLOW** and **RED** alternately. If the container fills up, empty it out.

When the first phase is complete, the machine beeps and the *multifunction* warning light remains steadily lit in **WHITE**. The water tank is empty.

Carefully rinse out the water tank and refill it with fresh water.

Empty and rinse the used capsule drawer, the drip tray and the container used and put them back in place.

Press the *dispensing* button to start the rinse cycle.

Rinse water (16 oz.) will run through machine. *Multifunction* warning light blinks **YELLOW** and **RED** alternately. If container fills up, empty it out.

When rinse cycle is complete, the machine beeps and the *beverage* warning lights and *multifunction* warning light blink simultaneously; the machine is warming up.

When the *espresso* and *multifunction* warning light come on and remain steadily lit, and the machine beeps twice, the appliance is ready to use.

Carefully empty and rinse out the water tank and refill it with fresh water (not carbonated).

Empty and rinse the used capsule drawer and drip tray.
Exiting the descaling cycle - Resetting the cycle

If the descaling cycle is selected accidentally, exiting is possible by turning the machine off and then on again. This does not eliminate the signalling on the control panel.

It is possible to cancel the descaling alarm by RESETTING while running the descaling cycle. To RESET, follow the procedure described below.

A

Raise the lever to open the capsule compartment.

B

Turn the knob all the way to the left (counter clockwise).

C

Press and hold the dispensing button for over 3 seconds to RESET the descaling cycle.

D

When the beverage warning lights and multifunction warning light blink simultaneously; the machine is warming up.
These alerts will help you to manage the machine better and know what is happening.

**HEATING**
The beverage lights (espresso, long espresso, brew) and the *multifunction* warning light blink simultaneously.

**ENERGY SAVING**
Once the “Energy Saving” function has been programmed, the machine will automatically reduce consumption one hour after the last time it was used. The beverage lights and the *multifunction* warning light blink slowly and sequentially.

**DESCALING SIGNAL**
When the *multifunction* warning light blinks in YELLOW every 5 seconds, a descaling cycle should be carried out.

**TEMPERATURE ALARM**
When the *multifunction* warning light comes on steadily in YELLOW. Switch the machine off and back on again.
**Alarms during normal operation**

### WHEN THE WATER RUNS OUT DURING OPERATION

1. **The water tank is empty when the multifunction warning light blinks in RED** and the machine emits 3 beeps followed by a single intermittent beep.

2. **Fill the tank with filtered water.**

3. **Press the dispensing button.** Wait for the machine to complete the water filling cycle.

4. **When the multifunction warning light and the selected beverage light come on and remain lit steadily, the machine is ready to use.**

### IF THE LEVER IS RAISED WHILE DISPENSING

1. **Raising the lever while dispensing a product may cause splashes of hot water. Danger of scalding!**

2. **The multifunction warning light blinks RED.** The machine will immediately stop dispensing.

3. **Close the lever.**

4. **Press the dispensing button to reset the alarm.** The machine is ready for use again.
Energy saving programming

The machine has a function (normally activated) which automatically reduces energy consumption by approx. 98% one hour after the last time it was used. Every time this procedure is run the currently active setting is modified. To deactivate (or reactivate) this function, proceed as follows:

1. Turn off the machine and shut off the lever.

2. Turn the knob all the way to the right (clockwise). Press and hold the dispensing button while switching on the machine by pressing the power on/off switch.

3. The function is deactivated (OFF) when: the multifunction warning light blinks 3 times RED and the machine beeps 3 times.

   The function is active (ON) when: the multifunction warning light blinks 2 times RED and the machine beeps 2 times.
9 Troubleshooting

**Problem**

No beverage is brewed.

**Cause / Solution**

The water tank is empty. The multifunction indicator light is on and red.

- Fill the tank with filtered/bottled water.
- Press the desired beverage button.
- The machine will resume brewing.

The beverage is not hot enough.

Cold cups / mugs.

- Scale build-up in machine.
  - Preheat the cup.
  - Descale the machine.

The lever cannot be lowered.

The used capsule drawer is full.

- Capsule stuck inside the machine.
- Empty out the used capsule drawer.
- Remove the used capsule.

*Beyond the recommended cleaning and maintenance procedures, the CBTL® machine is not user serviceable. For additional options, please refer to the CBTL® Limited Warranty on page 18.*

- 170 mm, 296 mm, 260 mm
CBTL® warrants this product against defects in materials and workmanship under normal home use for 1 year from the date of purchase. The warranty period commences on the date of purchase and CBTL® requires presentation of the original receipt to ascertain this date.

During the warranty period, CBTL® will either repair or replace, at its option, any defective product at no charge to the owner provided that you return your product, at your sole cost and expense, in accordance with the CBTL® Limited Warranty Claims Process. Unless otherwise required under applicable law, replacement products will be warranted only for the unexpired portion of the original warranty.

This limited warranty does not apply to cosmetic damage or any defect resulting from accident, negligence, misuse, failure to follow the product instructions, calcium deposits, improper or inadequate maintenance or repair by anyone other than CBTL®, normal wear and tear, use for commercial purposes, use on current or voltage other than as marked on the product, product alteration, fire, lightning, flood or other external causes.

To the extent permitted by applicable law, this limited warranty does not cover consequential or incidental damages such as property damage.

This limited warranty is only valid in the country of purchase.

The terms of this limited warranty do not exclude, restrict or modify mandatory statutory rights, if any, applicable to the sale of this product in your country of purchase.

If you believe your product is defective, contact CBTL® support service based on your country of purchase or visit our website at cbtl.com for contact details.
