WATER.
BASIC SOURCE OF LIFE

Water is the basic source of life. Even if it is not traded on the stock exchange, we probably do not exaggerate when we say that water is the most precious commodity. Our goal is to protect this precious fluid and bring it to our customers in the best quality.

Let the Water Flow

Ondřej Sochor
Partner – CEO
Swiss Aqua Technologies AG

Water together with air, resp. Earth's atmosphere, form the basic conditions for the existence of life on Earth. Most of the Earth's surface (71%) is covered by the salt water of the seas and oceans, which make up 97% of the entire water on our planet.

It might seem that we already know everything about water, but in recent decades a number of revolutionary findings have emerged that completely change the perception of water from a chemical formula to a rather living organism. These are the results of research by Professor Masaru Emoto (water perceives emotions), Gerald H. Pollack (4th state of water), Viktor Schauberger (water is a living organism), M. V. Kurik (water energy) or L. Montagnier (water has memory).

Our technologies use a tiny part of this new knowledge and we are constantly working to get to know water better and better, and we are implementing this new knowledge into future generations of our products. If our catalog or our products inspire you to read or view something about water on the Internet, then our work made sense.

About SAT

Swiss Aqua Technologies AG (SAT) is a company based in Cham, Switzerland. It consists of a team of engineers and scientists involved in the nearly two decades of product development in order to improve water quality, to save water with an emphasis on health effects and environmental impacts. The results are revolutionary solutions in a unique systems like IPS – Ion Polarization System, OFS – Optim Flush System or WCS – Water Care System.

IPS products are allready being sold to many countries all over the world, like USA, Mexico, Thailand, China, Israel and many others.

Our logistics partner for the expedition to Europe, America and Africa is SIKO. With 30,000 m² of storage space, 100,000 pallet places and 50 trucks loaded / unloaded every day, SIKO is the perfect partner for fast and reliable shipments worldwide.

Reserch and Development

- Own team of engineers and scientists
- International cooperation
- Technical support department

We cooperate with the following companies on the development and production of SAT brand products:

Alca®   *American Standard*   cersanit   **KALDEWEI**
Production

- International certification of production
- High level of automation
- Top quality control

Patented products

- Toilets and flushing systems
- Physical water treatment systems
- Multifunctional shower systems

Modern storage space

- Storage spoace 30 000 m²
- 100 000 pallet places
- 50 trucks every day

PATENT PROTECTED

Ion Polarization System
effective protection against corrosion and scale formation

Ion Polarization System (IPS) is designed for the physical-galvanic water treatment for households, public buildings and industrial plants. IPS is suitable for new pipelines for prevention, but also for the old ones, where it gradually removes existing deposits.

How the IPS works

IPS effectively prevents the formation of solid sediments and corrosion in cold and hot water appliances. IPS is a flow-through body with inside placed turbine-shaped electrodes of two different electrically conductive materials. The electrode design is patent-protected (TGP® – Turbulent Galvanic Polarization) and generates a swirling water flow, causing a change in the structure of the minerals.

Physical propensity at 50.0 μm level

Changes in calcium carbonate crystal when using IPS (increased to 50.0 μm). Water marked 0 is without the use of IPS. Water 1, 2 and 3 flowed through the IPS. The photos show changes in the crystal structure.

With installed IPS			

IPS **KalyxX**
your best defence against limescale

IPS Kalyxx is a flow-through body with inlet and outlet ports. Inside are placed turbine-shaped electrodes (not magnets) of two different electrically conductive materials.

IPS KalyxX is suited for both traditional tank and tankless water heaters in areas with moderate to severe hard water. It's an inexpensive way to protect their investment, easy to install, and a great value. IPS KalyxX is designed to fit directly on the male NPT/G inlet of any residential water heater. Without a IPS KalyxX installed, tankless heaters must be flushed and cleaned with chemicals every one to three years to function properly.

PATENT PROTECTED

IPS KalyxX RedLine

- Reduces creation of limescale on water supply elements (pipework, valves, taps, shower heads, waterheating coils of home appliances) – efficiency of 76%.
- New Patented technology TGP® – Turbulent Galvanic Polarisation – no chemicals, no external energy.
- Suitable for cold (drinking) and hot water.
- NRL Certificate for direct permanent contact with drinking water.
- Health safety product – each part of IPS is made from material suitable for contact with drinking water.

- Safe product – Verified Hydraulic Properties.
- TSU test report about Presure drop, Pressure resistance and Strength.
- Durable body (Stainless steel 1.4301) and internal parts – 2 years warranty, works at least 10 year without any maintenance.

IPS KalyxX Industry

The use of IPS Industry is effective and suitable in any running water plant. Washing lines, restaurants, canteens, bakeries, laundries, hairdressers, dry cleaners, swimming pools, dairies, breweries, distilleries, gardening, irrigation systems and much more. It also works reliably in heat exchangers, water systems, boilers, condensers, generators, heating systems, compressor rooms, refrigeration and air conditioning equipment.

- Solution for apartment buildings and buildings with higher hourly flow.
- Suitable for direct water-to-water heat pump circuit with high output, for stabilization of wastewater purifier at values guaranteed by the producer.
- Installation at the entrance to the building.
- Cold water supply pipes for central heating at transfer stations and boiler rooms.
- Prevent clogging of plate heat exchangers and stabilize specific heat demand for hot water.
- Stabilization of point corrosion of storage heaters.

Higher Washing Efficiency

It is proven with our internal tests and also by independent test (Clearview-USA) that washball has positive effects on Higher Washing Efficiency. During our test of Cotton /40°C/60ml washing gel we reach such a result.

• 100 % of tests were with the same or better results with using of WashBall.

• Average washing performance when using WashBall is 3,67% higher; highest efficiency achieved by black tea, the washing performance with WashBall was about 36,79% higher.

• If WashBall is used in standard washing, the effectiveness of the washing effect is usually increased (dependent on kind of contamination).

• The effect of using WashBall can be clearly recommended without negative side effects.

J ai une eau très dure.
Et les photo parle d elles même.
Je suis très écolo dans ma machine je ne mettais qu une lessive que je fais et du vinaigre ,mais ma machine etait toujours pleine de tartre.
En 3 machines avec la boule le resultat est vraiment visible.
Je suis tres satisfaite 😊😊😊😊😊

Cast acrylate

SURPRISINGLY LARGE INTERIOR

• Slim hems and a greater slope of the side walls give the bathtub a large interior space for a pleasant bath.

COMFORTABLE AND SAFE SHOWERING

• The wide interior space, flat bottom and the addition of a bath screen guarantee a safe shower while standing.

THE IDEAL SOLUTION FOR A SMALLER BATHROOMS

• The width of only 70 cm saves space in the bathroom, the shape of the bathtub allows it to be supplemented with any type of bathtub screen.

Quality material - Cast acrylate is used to make bathtubs. Products made of it retain their desired shape for a long time, they do not warp or crack. They have a high-gloss and non-porous surface that is easy to clean and has antibacterial properties.

Enameled steel

- combination of two natural substances - glass and steel
- steel is characterized by high strength and load capacity
- glass is decorated with great resistance to heat and chemical stress

Soundproof variants of Vivien Silent +
significantly reduce the noise of the bath during the bath.

Sound insulation meets the strictest Swiss and German standards
(SIA 181, DIN 4109 / A1).

Shower enclosures

Washbasins and toilets

Bathroom accessories

Application
For mounting in front of a support wall or in to a plasterboard construction.
For installation of wall-hung WC pans with a connecting pitch of 180 mm or 230 mm.
For floor thickness 0–200 m.m
For wall-hung WC.

Features

- Dual flush independently adjustable with hygienic reserve
- Compatible with all ALCA flush plates
- The construction of polystyrene insulation prevents condensation forming on the surface of the tank and dampens the vibrations from the tank into the building structure
- The frame allows the anchoring to a separate sufficiently strong plasterboard partition, in front of the bearing wall
- The service opening cover simplifies assembly and prevents the penetration of moisture and impurities
- Frame material: powder-coated metal
- Installation depth adjustable from 20–95 mm
- Suitable for installation of remote or sensor flushing
- Possibility of tilting the cistern for easy installation in wooden construction buildings or mobile cells
- The cistern is made of one piece, thus ensuring 100% impermeability
- The installed module is covered with a plasterboard panel and there is no need for any additional fixing or anchoring elements
- Adjustable anchor feet and a spring-lock system, with a range of 0–200 mm
- Dispenser for WC cistern tablets included
- Sliding rail holder for the waste connector can be set to eight positions between 0–93 mm
- Prepared for connecting a bracket with a DG 1/2" conversion for bidet seats and sprays
- Water supply from the rear/top
- Angle valve with the ability to connect to the Mepla piping system
- Maintenance work without using any tools
- Installation depth 125 mm
- Visible marks for both leveling and the centerline
- Cistern hinges made of two-component material insulate the transmission of vibrations from buildings
Pre-wall instalation system
for dry build up (plasterboard)
