

USING A PIECE OF STRING

1. Put a knot at the start of your string.
2. Wrap the string around the finger you want the ring to go on, making sure the knot is at the start of the string.
3. Find the length of string that wraps **EXACTLY** once around your finger.
4. Measure that length of string with a ruler against the closest circumference in the chart below.

USING ANOTHER RING

1. Use an existing ring.
2. Align your ring with one of the circles below.
3. Making sure the inside edge of your ring fits against the drawn circle.
4. Make sure you can see the whole drawn circle inside your ring.

USING RING SIZER – Make sure you UNTICK ALL 'SCALE TO FIT PAGE' TICKER BOXES WHEN PRINTING

1. Print this page and cut out the ring sizer shown below. Make a slit next to the arrow.
2. Place the ring sizer around your finger, then slip the pointed end through the slit with the number facing out.
3. Tighten the ring sizer by pulling the pointer end towards your finger. The fit should be snug but comfortable.
4. Read the number at the slit where the arrow points. If your ring size fall between two numbers than we suggest your size is a half number for the lowest number.
