Technical data sheet

Level 3 Surgical Mask

AusMed HEALTH
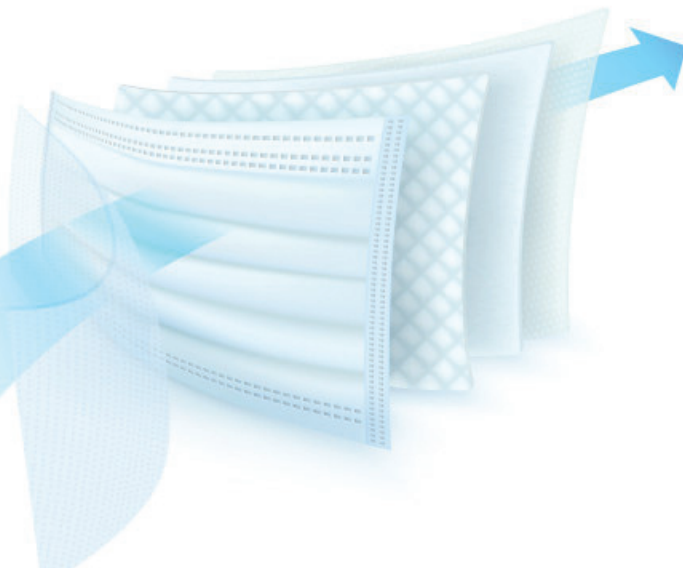

Face masks can be an effective control measure as they prevent droplets of bodily fluids from escaping via the nose and mouth. They also protect the wearer against splashes and sprays (sneeze and coughs) from other people.

AusMed Health Level 3 Surgical Face Mask
A single-use face mask designed to meet Australian Standard AS/NZS 4381:2015. The lightweight mask is designed to promote comfort and excellent breathability, with adjustable nose wire and soft ear loops to hold the mask in place.

The AusMed Health Surgical Face Mask (non-sterilised) is constructed of four layers of material to ensure compliance to the highest level of protection.

The composition is two outer layers of spunbond non-woven material, a middle layer of meltblown and one inner layer of hypoallergenic spunbond nonwoven materiel for the wearers comfort.

Key Features

- Exceeds Australian Standard AS4381-2015
- Bacterial filtration efficiency (BFE) ≥98%
- Differential pressure, mmH_2O/cm^2 <5.0
- Resistance to penetration by synthetic blood to 160mmHg
- 17.5cm x 9.5cm in size

Listed on the Australian Register of Therapeutic Goods (ARTG ID 341864).
