1 CHANNEL CS SERIES AMP

---

By combining years of innovation, invention and insight from HARMAN brands, JBL® Commercial Series Amplifiers (CSA) go well beyond the expected in generating powerful sound.

The efficient performance of Crown's DriveCore™ Technology continues to set new standards in commercial power amplifier technology.

Simple to configure, the CS amp provides a DriveCore-based sound solution. This replaces up to 500 parts with one small chip, significantly reducing the part count and increasing reliability while maintaining superb performance.

Supporting 70V and 100V installations out of the box, CS amps include RJ45 connectors for use with JBL CSR-V in-wall volume controls.

And with HARMAN's GreenEdge™ environmental initiative, CS amps quickly pay for themselves in energy savings.

- Listen to deep lows and extreme highs at 20 Hz - 20 kHz frequency
- Smartly manages power at 8 Ohm impedance to execute sound flow. So Indulge yourself in HQ audio output!
- Helps maintain the signal's strength
- Sleep mode disable function
- Energy-efficient amplifier
- Sleek industrial look with illuminated rings making knobs easy to see and use
- Supports JBL CSR-V wall controller via CAT5 cable with RJ45 connectors
