

NEW Retail Shelf Header Cards quick setup guide

Merchandising Guide

Create your Eufora Retail Center effortlessly with our NEW Retail Shelf Header Cards and Customer Display Cards.

Header Cards

Designed to stand tall on your shelf, these signs boast special UV ink for fade resistance and a sturdy metal base for stability.

Step 1 Peel off the protective film from the display base.

Step 2 Align the bottom center back of the header card with the metal stand at an angle on a level surface.

Step 3 Rotate the header card onto the adhesive strip on the base, press to ensure a secure bond between the metal base and header card.

Consumer Display Cards

Use the NEW Consumer Display Card stands: magnetic holders that keep your cards secure without wilting or falling over.

Step 1 Peel off the magnetic strip from the back of the Consumer Display Card stand.

Step 2 Align the Consumer Display Card with the metal stand's back and secure it using the magnetic strip.

Note The small holes in the Consumer Display Card and Header Card bases aid in construction and coating, they won't affect the functionality of either stand.
