maximum**

### IMPORTANT INFO ON LEVEL 9

**Best used on untreated hair.** Should the hair be colour-treated, lightened or weak, do not go over the recommended processing time, and keep checking the lightening level and condition of the hair fibre throughout processing.

### spotlight: our top tips

1. Shake the bag before use to allow the ingredients to mix together
2. Check the speed guide
3. Weigh out your mix and respect the mixing ratio
4. Mix gently
5. Don't fold your foils too tight if using foils
5. We always recommend doing a **full consultation** before every lightening service.
6. We recommend using a low and slow approach with 5 vol, 10 vol or 20 vol for all lightening services.
