Fast and Simple to Fit

1
Ensure the combination is set to the designated 'unlock' code. The default code is ● ● ● ●

2
Take lock pin end & thread through items to be secured, ensuring it loops through an item that can not be moved or removed from its location such as a caravan a-frame or bike rack.

3
Insert lock pin into combination end.

4
Twist/scramble code for security.

www.milenco.com

How to set a new code:
1. With the cable in the 'open position' take the combination end.
2. Turn the end black collar ¼ turn clockwise until it will go no further.
3. Put in new code.
4. Turn the end black collar ¼ turn anti-clockwise until it will go no further.

Your new code is set and ready to use.
