45

At a spacious 5.9m, the Prospero Pro is the big brother to the Oberon, perfect if you want a plunge pool with more swimming space. Designed for a superior training experience, our inverter technology allows you to customise your water speed via 10 speed settings, whilst patented swim technology ensures a powerful yet smooth, continual flow of water, keeping you in a natural swim position. Galaxy's plunge pool range provides a swimming pool alternative for customers who do not want the hassle or cost of in-ground work. Instead of seats, they feature wide steps, creating maximum space for swimming.
