

DAKINE
WETSUITS

SS2024

v6. 06 JUNE 2023

RESPECT THE LAND THE SEA THE LOCALS

PERFORMANCE AND DURABILITY

Our first wetsuits set out to re-calibrate the balance between performance and durability. Alongside better value and product experience for the customer, Durability creates a long product lifespan, reducing the overall environmental impact.

SUSTAINABILITY

In 2023, we took a big step to solving the post consumer wetsuit waste problem: FriendlyPrene, the world's first neoprene with Eco-One® enhanced biodegradation.

For 2024, we introduce an even greater step - **Natural Friendlyprene - a plant based foam with Eco-One® enhanced biodegradation.**

RECYCLING

This year will also see all of our wetsuits transition towards all recycled linings across the whole range at every price point.

To even further reduce the footprint of our products we have partnered with Circular Flow, to recycle old wetsuits into new neoprene that can be re-made into other products, prolonging the useful life of the material.

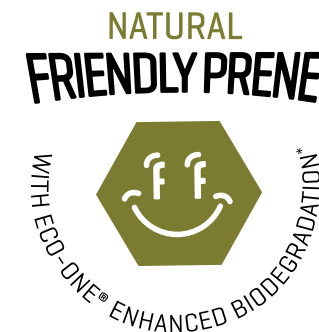

NATURAL FRIENDLYPRENE - PLANT BASED NEOPRENE WITH ENHANCED BIODEGRADATION

In 2023 after 2 years of development, we released Friendlyprene - the world's first neoprene with enhanced biodegradation*. This was a huge step towards solving the post consumer waste problem of neoprene.

For 2024 we have taken Friendlyprene even further creating a Natural Friendlyprene - a plant based neoprene with the same enhanced biodegradation and a new level of stretch for natural foams.

Natural Friendlyprene is the biggest step we can take towards creating the lowest impact foam for our wetsuits, reducing the use of chemical compounds in the raw materials and leaving the least post consumer trace.

*EcoLogic's Eco-One® technology enhances the biodegradation of FriendlyPrene in biologically active landfills [appropriate facilities not available in all areas]. ASTM D5511 tests, representing biologically active landfills, on FriendlyPrene have shown 30% in the first 522 days.

MĀLAMA SERIES

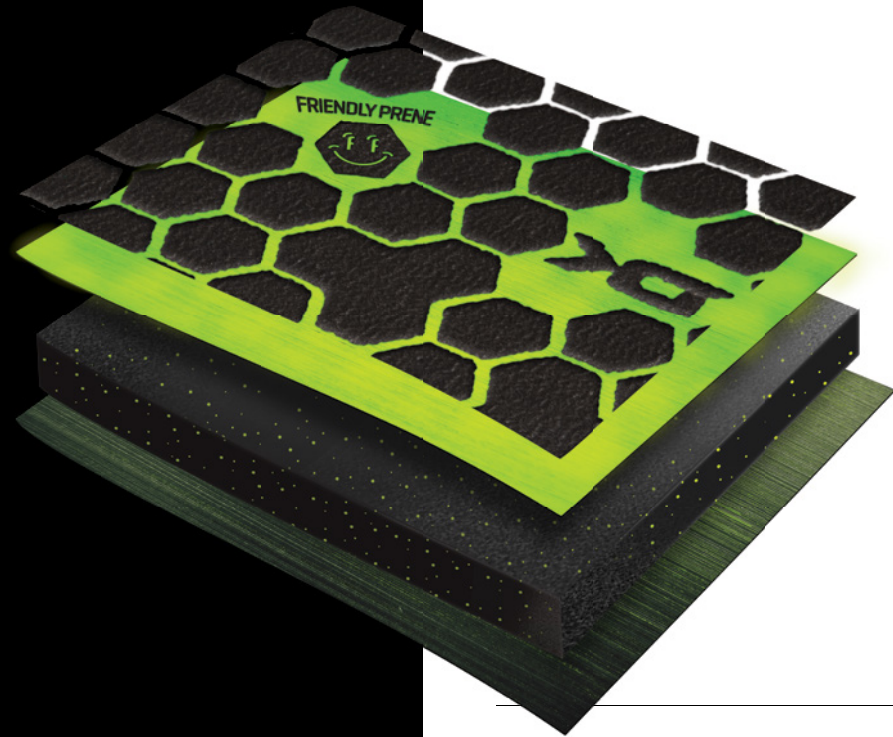

HIGHEST PERFORMANCE, LOWEST IMPACT

Mālama is a word deeply embedded in Hawaiian culture, referencing an action, a person, a way of life... mālama relates to our environment, culture, and everything with which we interact. It is something we all should do more of everyday.

The Mālama wetsuit is the pinnacle of our ambition for a cleaner way to do wetsuits.

First and foremost, this is a high end performance wetsuit. Based on our APEX fit pattern with a zip free design pioneered and proven on our Cyclone range, using Yamamoto #39 rubber the Mālama fits, feels and performs at the highest level. In line with our durable design concept, the Mālama continues our mission to recalibrate balance; putting durability at the centre of wetsuit design to make longer lasting products.

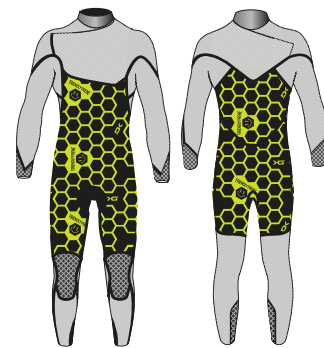

The Mālama, goes one step further to solving the problem of post consumer neoprene waste; FriendlyPrene, developed with our friends at Yamamoto and EcoLogic LLC.

FriendlyPrene is designed to biodegrade in a biologically active landfill [appropriate facilities not available in all areas]. ASTM D5511 tests, representing biologically active landfills, show 30% in the first 522 days.

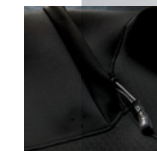

FriendlyPrene uses OEKO-TEX certified linings made from recycled sources.

Dakine Mālama brings the highest level of performance and the lowest long term impact.

CYCLONE SERIES

DISRUPTIVE DESIGN APPROACH

Our brief was clear – the best performing wetsuit for fit, stretch and warmth, to match or exceed the best in the market, and incorporating a level of durability to challenge the expected lifespan of most high end wetsuits.

From creating an all new wetsuit pattern; our Apex Fit, to developing our own thermal linings and industry first innovations, the Cyclone was our skunkworks of ideas.

Featuring all of our best materials for optimum performance: DKLite Oyster shell based neoprene, Hexotherm 2 lining and Triple lock seams. With innovation including industry first Curv Lock and details as Hex embossed stretch woven lining and anti-fray cuffs, low impact processes like Dope Dyed yarn and solvent free lamination, the Cyclone is the pinnacle of our wetsuit program's development.

With 20% DKLite neoprene these are super light with next level stretch. Full suits are fully lined in the core with Hexotherm 2 for warmth.

The Cyclone features our unique Curv lock feature, combined with a smooth seal neck plus cuffs and ankles reinforced with Resist panels for a water tight seal.

Seam construction is designed for minimal weight and maximum flex: double glued with no stitching, sealed and reinforced with external sealed seam and internal tape throughout.

LIGHTWEIGHT, HIGH PERFORMANCE, FULL FEATURED FLAGSHIP MODEL WITH BUILT-IN DURABILITY

- THERMAL LINED CORE IN FULL SUITS
- FULLY TAPED AND SEALED SEAMS
- DK_LITE NEOPRENE THROUGHOUT SHOULDERS AND ARMS

TEAM LTD

The Team LTD is a Mission spec wetsuit, with a one off special edition Checker print.

Featuring FLX lining, stretch woven with reinforced elastane for next level strength in stretch fabrics. Specially developed Hexotherm high loft, quick dry lining is featured in core areas to ensure absolute warmth and comfort.

Seams are triple locked - twice glued, 3D stitched and critically taped to seal and reinforce seam junctions. Ankle and cuff seals are reinforced from over stretch using RESIST lining over D foam high modulus limestone neoprene. Plus oversized knee panels, anti-fray compression cut cuffs, soft feel collar, YKK zips and more.

MISSION ECO SERIES

NEXT LEVEL PLANT BASED RUBBER

The MISSION ECO is our most sustainable wetsuit to date. The design is based on our best selling, no compromise Mission spec wetsuit; full stretch, GBS, taped seams and Hexotherm lining.

For 2024 we've introduced Natural Friendlyprene, a plant based neoprene with enhanced biodegradation and a new level of stretch for natural foams. The linings are recycled with upgraded Recycled Hexotherm FP lining in the core.

Natural Friendlyprene is the biggest step we can take towards creating the lowest impact foam for our wetsuits, reducing the use of chemical compounds in the raw material and leaving the least post consumer trace.

Mission Eco full suits feature Recycled FP Hexotherm lining in the core and true thickness neoprene making these super warm.

Natural Friendlyprene is used in all panels; our most sustainable high performance option.

Tried and tested seam design - the best of everything: double glued, 3D stitched and taped.

This is the most sustainable, durable design.

HIGH PERFORMANCE, NO COMPROMISE WETSUIT WITH BUILT-IN DURABILITY AND NEXT LEVEL SUSTAINABILITY

QUANTUM SERIES

GAME CHANGING APPROACH

The Quantum is not entry level, budget or cheap. This range embodies our game changing approach to performance wetsuits; performance and warmth combined with next level durability at an affordable price.

The build quality on Quantum matches our standards set throughout the range - all seams are 3D stitched and taped or critically taped for maximum security. All panels use DK limestone neoprene and our specially developed linings - stretch zones feature our top end S type neoprene lined with FLX lining. Internally THERMO is used in all upper body panels where wind chill is a factor. The body makes use of NPM, our flex lining with very high surface resistance and our high modulus D foam neoprene. Using our super high end Apex Fit pattern for perfect fit and extreme freedom of movement and available in our 'Easy In' chest zip entry.

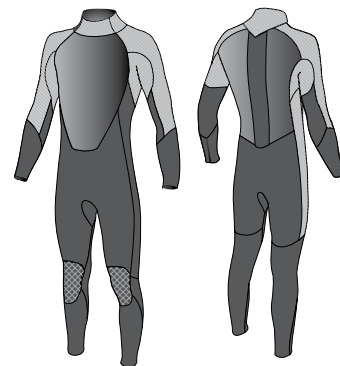

The Quantum will change your expectation of a what an affordable wetsuit can be.

S type neoprene in all upper body panels with our FLX_THERMO lining inside and out gives the same full stretch as the Mission model in the arms, shoulders and back - the key areas for paddling and flexibility - making the Quantum feel like a top end suit.

The staple of any good performance cold water wetsuit - double glued and 3D stitched. All seam junctions are spot taped inside for extra strength and the critical crotch seam is fully taped.

This method is water tight, strong and very flexible.

INCREDIBLE PRICE : PERFORMANCE RATIO

- FRIENDLYPRENE STRETCH PANELS

QUANTUM SERIES

FLATLOCKED

Flatlocked seams are constructed by overlapping the neoprene panels then using four interlocking threads, with two passing through the neoprene.

This creates an extremely strong, flat and comfortable seam, but only suitable for warm water wetsuits of 3mm or thinner due to the vertical threads allowing water to penetrate.

Our Flatlocked Quantum wetsuits feature the same quality and materials as the GBS models, achieving even greater levels of affordability.

RANGER SERIES

BUILT FOR KIDS

If you want to test the durability of a wetsuit, give it to some kids. Any parent will agree - kids trash wetsuits.

We wrote a specific brief for the Ranger, a suit designed around Kids - less high end surf suit and more adventure hardware. The Ranger is a design dedicated to swimming, scrambling, surfing and anything else to do with water. Soft and flexible where essential and super durable elsewhere, it's truly built for purpose. Also features an emergency whistle.

This level of durability also means a good re-sale or 'hand me down' value when they're inevitably grown out of.

Resist panels use our most durable abrasion resistant lining over a high density foam to withstand the maximum amount of wear and tear.

The Ranger features Resist panels on the whole seat panel, plus elbow patches and a combined knee and shin pad.

The seams are triple glued, 3D stitched and critically taped for max strength and warmth.

Our top end FLX_THERMO lining is used in the shoulders and back for flexibility and the back of the leg to help getting in and out.

As an extra safety feature our kids Ranger comes with a safety whistle in an easily accessible neoprene pocket.

KIDS

KIDS RANGER CHEST ZIP

· 5/4/3mm - Black/Green

- RESIST panels in elbow, seat, knee and lower front leg
- FLX_THERMO lining in stretch areas

RTR WETSUIT

DESIGNED FOR PURPOSE, BUILT TO LAST

The RTR range is designed for any water based activity and adventure. Not specific for surfing, this is a wetsuit that can be used for a multitude of purposes where cold water, or the need for protection is a factor.

For freedom and comfort the upper arm and shoulder area uses the same high stretch neoprene and linings found in our top end wetsuits. Elsewhere is a combination of very durable materials in a carefully positioned seam and panel layout.

With surf hire and adventure activities in mind, these suits are designed to withstand the the highest level of heavy duty usage.

MATERIALS:

External linings.
 FLX- Stretch woven for extreme flex and dope dyed, only in key stretch areas.
 NPM - high wear lining where durability is a priority.
 RESIST - extremely high wear external lining where durability is a priority, used extensively.

Neoprene foam.
 S type is used in key stretch areas.
 D foam is everywhere else, especially in areas of high impact such as kneepads.

Internal linings.
 FLX - Stretch woven for extreme flex and dope dyed.
 NPM - high wear lining where durability is a priority.

DOUBLE THREAD 3D STITCH - Water tight and very strong, the double thread stitch wont run if torn.

2 x GLUED SEAMS - Glued is applied in a 2 stage process for absolute hold and water tight seal.

SINGLE THREAD 3D STITCH - On 5/3mm models used on the inside for extra strength.

CRITICAL TAPE - high wear lining where durability is a priority.

UNISEX

SIZE GUIDE AND WARRANTY

WARRANTY

General Warranty Information and Policy

We stand by the performance and quality of every product we make. As such we offer a comprehensive warranty to repair or replace any Dakine product that does not fulfil our high quality standards. If the product is found to be faulty under normal use and proper care, Dakine will repair or replace the product at our discretion. The decision to replace or repair a product is made by Dakine after the defective product has been sent to us. At no time does Dakine offer a refund. Defective product should be returned CLEAN AND DRY and postage prepaid. The return should also contain a note which should include returns number, product description, product defects, requested action, return address (including postcode), daytime telephone number with area code, customer/accounts name and a copy of the purchase receipt (general public enquiries only).

Product Warranty

Selected Flatlocked Wetsuits and GBS wetsuits: Limited 2-year warranty from date of purchase exclusively on workmanship and materials - Zips and Liquid seal excluded.

ACCESSORIES: Limited 90-day warranty, from date of purchase, on workmanship and materials.

Using the Warranty

There are 2 ways to use the warranty:

1. Return to store: [Retail Customer]. Go back to your local Dakine dealer, they'll send your suit to our Dakine service centre. You must have proof of purchase [receipt or invoice].
2. Dakine Wetsuits repair service [Trade and Retail Customer]. Send the product back to Dakine by certified mail, along with proof of purchase [receipt or invoice]. Your wetsuit will be returned to you as soon as possible free of charge [if covered under warranty].

Returns

- Dakine does not accept color or size exchanges.
- Product may not be returned without obtaining a Return Authorisation number from Dakine. This returns number must be clearly visible on the outside of all returned packages. The issuance of returns is subject to the sole discretion of Dakine.
- All returned products must be shipped freight prepaid. Unauthorised packages/returns will be refused.
- Authorised returns will be credited back to the dealer's trade account including the discount terms after receipt of the product.
- Dakine has the right to refuse any returned product that is damaged by any means including but not limited to improper packing or improper display methods at dealer's location, or damage caused by customers.
- "Discounted," "Discontinued," "Seconds" and altered suits are FINAL SALES ONLY. NO RETURNS FOR ANY REASON WHATSOEVER [SUITS WITH INTERNAL LABELS MISSING ARE VOID OF WARRANTY UNLESS INSTRUCTED OTHERWISE].

The following will not be covered under warranty:

- Damage caused by anything other than defects in materials or workmanship.
- Use in commercial, rental, teaching or instructional programs or activities.
- Damage caused by extended or excessive exposure to sunlight, improper handling or storage, or failure to follow instruction provided with this product.
- This product when classified as being 2nd hand or it is being sold as a 2nd [it is being sold as a product with existing defects].
- Normal wear and tear, including scratches and fading.
- Wetsuits repaired/altered by a repair service other than Dakine.
- Materials over 1 year [from date of original purchase] or 90 days for accessories.
- Warranty request without original receipt.
- Damage caused by contact with chemicals [chlorine, petrol etc].
