The smart USB handset
for the office and
Unified Communications

plathosys®

CT-400 PRO

A handset for the modern workplace – where your PC becomes a highly effective telephone

Plathosys CT 400 PRO: For crystal clear communication in the office

The smart USB handset Plathosys CT 400 PRO provides with its wideband audio performance excellent voice quality and natural sound experience when used as PC telephony.

Making notes while telephoning and still having both hands free – the internal loudspeaker that can be switched to open listening creates comfortable and efficient communication in the working environment.

Thanks to the assistance of the standard Hearing-Aid-Compatibility (HAC) the CT 400 PRO also allows those with hearing aids to use the very latest in modern communication technology.

Through the HID standard (Human Device Interface) the CT 400 PRO links into every PC environment.

Elegant and attractive design
