

ADA Compliance

General Requirements For ADA Approved Saunas

(Additional local code requirements may apply)

We understand that everyone deserves to experience the health and well-being a sauna can bring. In Am-Finn we bring you a sauna design that matches the requirements needed to make the sauna lifestyle handicapped accessible.

- A 36" door width for ample access
- A door threshold of no greater than 5/8" high
- Doors should not swing into the clear floor space.
- Sauna doors must always swing out of the room.
- A 60" diameter turn-around space inside the room.

EXCEPTION: A readily removable bench is permitted to obstruct the ground space. It needs to be movable in order to temporarily provide the 60" turning circle.

- One bench should have a seat that is 42 inches long minimum and 20 inches deep minimum and 24 inches deep maximum.
- Back support should be 42 inches long minimum and extend from a point 2 inches maximum above the seat surface to a point 18 inches minimum above the seat surface.
