

# THE ADVANCED HYBRID STEAM ROOM

The most energy efficient and sanitary steam room on the market today

## FINALLY, A FULLY INTEGRATED, TURN-KEY STEAM ROOM:

### THE ADVANCED HYBRID STEAM ROOM

- Custom-designed Luxurious
- Moon-glow Ceiling with Lighting
- Custom Benching
- Full Glass Door with Chrome
- Complete Steam Room Equipment
- Powerzone 100 Auto-Sterilizer  
All Included

The Advanced Hybrid Steam Room is an aluminum framed, free-standing room that only requires an open-framed space in which to place the steam room. No interior finished, insulated or waterproofed walls or ceiling.

The Advanced Hybrid Steam Room wall and ceiling materials are simply attached to the free-standing aluminum frame from the inside and include a fully sealed, gasketed system.

## The most sanitary steam room available on the market today

Slimy benches, moldy rooms that require aroma pumps to mask the mildew-smell, toxic cleaning chemicals and the spread of virus and bacteria a problems of the past!

As a result of the Advanced Hybrid Steam Room's smooth surface design and the inclusion of our patent-pending powerzone 100 technology, our steam room's are highly resistant to the growth of mold/bacteria/mildew/virus. If is organics do begin o develop in the steam room the powerzone 100 automatically sanitizes and sterilizes the space with the push of a button.

No more hours of labor and/or harmful cleaning chemicals required!

Leed Credits	Score
Water Efficiency	WE 3.1
Optimized Energy Performance	WE 3.2
Low-Emitting Materials	WE 3.1
Indoor Chemical & Pollutant	EQ 4.1
Source Control	EQ 5

## The most energy efficient steam room on the market today

Traditional tile steam rooms require thick CMU walls and / or concrete substrates that will continually absorb the heat from the steam room.

This requires up to twice as much energy to maintain proper temperature. The engineered design of the Advanced Hybrid Steam Room eliminates the need for CMU / concrete substrates that requires up to 50% less energy

Less energy means smaller steam equipment and significant cost savings both upfront and ongoing

**Cost-Efficient**

**Eco-Friendly**

**Easy to Install**

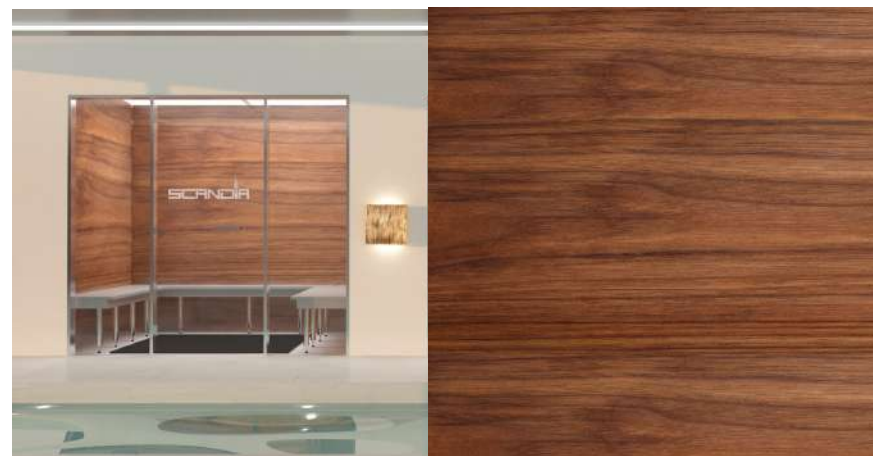

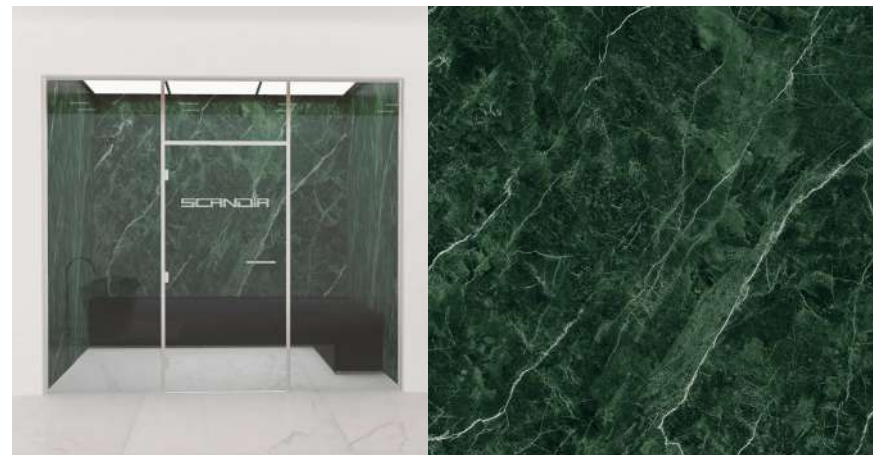

**Low Maintenance**

# WALL PANELS OPTIONS

The Advanced Hybrid Steam Room can be fully customized. Select any one of our screen-print designs and/ or supply one of your own to create steam room walls to match any design intent. Select one of our 8 standard bench colors and include one, two or three tier benching on one or all walls of the steam room.

Include full skirting, partial skirting or no skirting to create the ideal sitting configuration.
