

SAUNA WOOD OIL

INTRODUCTION

Having a sauna in the privacy of your own home provides luxury as well as the health benefits for the body and spirit. Therefore, caring for its wood is vital in prolonging its life.

There are different treatments that may be used to enhance the saunas wood, but the finest method is to apply Sauna Wood Oil by Scandia Manufacturing.

FEATURES

- Restores old wood and keeps new wood looking refined
- 100% Organic: Contains no harsh chemicals or additives and is a non-toxic blend of aromatic oils and highly refined, food-grade, clear petroleum-based oil
- Cedar Scent
- Overlapping during application will not cause lap marks; One gallon will cover approximately 600 to 800 sq. ft of surface area
- Interior and Exterior application
- Forms an attractive, subtle, glossy finish
- One US Gallon (3.8 liters) - Weight: 8 lbs (3.6 Kg)

A close-up photograph of two wooden planks side-by-side. The left plank is light-colored and shows signs of wear, including scratches and a faded surface. The right plank is a darker, richer brown color with a smooth, polished finish and visible wood grain. The image is split vertically down the middle by a thin yellow line.

HOW IT WORKS SAUNA WOOD OIL

Step 1. Pre-heat Sauna to 90° F (32° C)

Step 2. Apply oil with natural bristle brush

Step 3. Heat sauna to 160° F (71° C) for 1 hour

TIPS ON PROPER APPLICATION

- Shake the bottle vigorously for 5 minutes before application
- Ensure the surface is clean and dry before application
- Apply in the direction of the grain with a natural bristle brush
- Apply generously if the sauna is old and has never been treated (less product will be needed if the sauna is new or has been previously treated with Sauna Wood Oil)
- Overlapping during application will not cause lap marks
- Lightly sand any stains or blemishes on wood before applying oil
