CAPRONI CASTS
Questions

Do you think students in fine and industrial art classes would like to make plaster or cement casts from Caproni models if piece moulds and materials were available?

Do you think such a project would appeal to Teachers and Supervisors of such classes?

Would it be a project better adapted to fine or industrial art classes?

Could some of the casts of suitable subjects be used as drawing models in your school system?

Would you look with favor on coloring some of the casts made by the class such as Mexican or Italian pottery?

They would have a decided value from an exhibition standpoint, but is your situation such that the better casts could be offered for sale?

In your opinion what would be the lowest grade capable of making the simplest casts?

Should this be a Grade________? Junior High________? or High School project?

Are you interested in the possibilities for your own Classes?

Have you a Caproni Catalogue?

We need and want your advice about a new school art project which so far is only in an embryonic state ...

Many times a Customer has wanted to buy a mould from which they could make plaster or cement casts. Some have wanted to color the casts for exhibition purposes and others have wanted to offer them for sale. The Caproni Collection consists of nearly 4000 subjects, and for each subject we must have a master model and either a glue mould — from which only a few good casts can be made — or a piece mould from which a large number of good casts can be made. But only one mould for each subject, and therefore not for sale.

Now if we find enough interest among our school friends we propose to make several moulds of some of the interesting subjects and offer them for sale to art classes together with the necessary material for cast making. The first sets would probably be of simple and compact subjects, small animals, vases, heads, Mexican and Italian pottery that would lend itself to coloring. After a class had a little experience more difficult casts could be made that require remounting arms, legs, etc. BUT ONLY MOULDS OF WORTHWHILE AND BEAUTIFUL SUBJECTS should be used, we would see to that. The students who have done such casting in our shops have been delighted and more than enthusiastic. The coloring of some of their own casts has been an added pleasure. It might be well to offer the moulds and material in Sets graded according to the difficulty of the moulding to be done and the number of moulds per set. Good piece moulds are difficult things to make but it is possible that small sets could be made to sell as low as $25.00, but for a class of 16 to 24 students having about a one hour period for such work, the cost of moulds and material would be from $50.00 to $100.00. Complete instructions for the Teacher would be furnished.

So that we will have a cross section of your valuable opinions, will you kindly answer the questions and sign your name?

There is absolutely no obligation of course, but if you are interested you will be among the first to receive literature concerning the new project.

INTRODUCTION

THE numerous demands for suggestions on school decorations which we have received have led us to the issue of this booklet. As a written description on this subject, no matter how lengthy it might be, could hardly give a conception of the possibilities of adapting subjects to given spaces, we are presenting herewith a few illustrations made directly from decorations already placed in schools. These illustrations were taken from nearby schools as a matter of convenience in obtaining photographs. We offer this explanation so that persons may not conceive the idea that the decoration of schools is confined to the localities given, as for the last twenty years we have furnished our casts for school decoration throughout the United States, and extending beyond these limits to Canada, to the Philippine Islands, the Hawaiian Islands, Cuba, Porto Rico, England, Scotland, Japan, and the Argentine Republic.

CAUTION

A poorly made cast cannot be called a work of art, for in order to be a work of art it must have all the fine texture and detail of the original. Art museums are authorities upon the quality of casts and will not purchase poorly made ones. Why, therefore, should schools? The best recommendation given our work is the fact that we have furnished our casts to the leading art museums of the country, such as the Metropolitan Museum, New York, the Museum of Fine Arts, Boston, the Pennsylvania Museum, the Art Institute of Chicago, the Museum of Fine Arts, Detroit, the Valentine Museum, Richmond, and many others. No other cast maker in the country can honestly make this statement.

Many imitations of our casts are made. These are poor recasts of our casts, while our casts are faithful reproductions from first-class imported models. These imitators, with their inferior casts and recasts of our casts made by unskilled labor, are soliciting business from schools by catalogues and other means. In purchasing such goods, schools are paying out good, and often hard earned money, and receiving in return worthless goods. (See page 46.)

SCHOOL CATALOGUE

We have issued a special catalogue illustrating over 500 subjects of ancient, medieval and modern sculpture, especially adapted for school decoration. This catalogue is sent free upon application to any school official.

Our collection, a part of which this school catalogue shows, is the largest of its kind in the world. It includes a large variety of subjects for modeling and drawing schools—such as details of historic ornament, casts of hands, feet, torsos, fruits and flowers, masques, heads of animals, etc.

Modeling clay and Plasteline, in large or small quantities, are also furnished.
