BATTERY STORAGE

Before storing Expion360 lithium batteries for periods longer than four months, ensure the batteries are at 80% state of charge using the Expion360 battery monitor or the Bluetooth App. Do not store batteries below 50% state of charge. If the battery is not equipped with either Bluetooth or a battery monitor, measure the voltage with a multimeter to confirm the state of charge is not below 50%. Battery specifications can be found in the battery user manual to confirm the measured voltage is within an acceptable range. For further instructions see the battery user manual. Damage to the battery(s) will not be covered under warranty if the user has failed to adhere to the storage instructions found in the battery user manual.

WATER SUBMERSION

E360 lithium batteries are not designed to be submerged in water for any length of time and are not intended for use in environments where prolonged water exposure could be reasonably expected. If damage to the cells or BMS is incurred from water ingress into the battery case, the battery is damaged beyond repair and will not be covered under warranty.
