

FloraLife® Bouquet Wrap

NEW AND IMPROVED BAG SIZE AND MATERIALS.

FloraLife® Bouquet Wrap prevents the wilting of cut flowers and floral bouquets during shipping and transport. This quick and easy hydration system, supplies the solution flowers need whenever a convenient water source is not available, such as during the stressful shipping process. As a result, flowers will arrive fresher looking, improving the customer experience and encouraging repeat sales. The highly absorbent wrap material is dipped in water, wrapped around the stem ends, then sealed in a bag to prevent leakage. Flowers can be stored upright or flat without leakage. For best results, pads should be soaked in a FloraLife® flower food solution.

Product Features and Benefits

- 70% plant-based material is highly absorbent.
- Continuously hydrates flowers during shipping (tested up to 48 hours).
- Prevents flowers from wilting.
- Stops spills, transport flowers upright or lying down.
- Flowers arrive hydrated and fresher looking, improving the customer experience.
- Perfect for any event where no convenient water source is available, like outdoor weddings.
- Can last for days.
- **New larger bag size to fit more stems.**

Simple to Use

- Hydrate bouquets in a FloraLife® flower food solution for a minimum of 2 hours, preferably in a cooler.
- Apply bouquet wrap dry around stem end and secure with rubber band.
- Completely submerge the wrapped bundle in a properly dosed and mixed FloraLife® storage and transport solution. Let it soak for 10 seconds.
- Insert wrapped stem end into bag and secure with rubber band.
- For more detailed use information, refer to the Use Instructions document.
