

# FloraLife® ForEver Green

Before adding fresh cut flowers or other adornments to your evergreens, spray a thin coat of FloraLife® ForEver Green on for healthier and longer lasting greens. This ready-to-use spray is safe for all evergreens and leatherleaf ferns. Drying clear with no pesky residue, this liquid shield aids in holding moisture in, resulting in less needles dropping. Perfect for use with evergreen greens, trees, wreaths, garlands or leatherleaf ferns, it reduces drying, browning, and wilting. It also provides optimal longevity, maintaining color vibrancy.

FloraLife® ForEver Green can also be used as a dip application with cut evergreens used in arrangements, corsages, boutonnieres, wedding designs, or stand alone as a cut tree. Whether dipped or sprayed, always allow the product to dry for at least an hour at room temperature before decorating or putting into a cooler.

**FloraLife® ForEver Green must be shaken thoroughly before each use.**

## Product features and benefits

- Ready-to-use spray. No mixing required.
- Spray dries to a clear finish with no residue.
- Safe to use with evergreen greens, trees, wreaths, garlands or leatherleaf ferns.
- Aids in holding moisture in, resulting in less needle dropping.
- Reduces dehydration, browning and wilting.
- Provides optimal longevity and maintains color vibrancy of evergreens.

## Product use instructions

- Thoroughly shake FloraLife® ForEver Green container before use.
- Spray cut evergreen branches, wreaths, garlands, cut trees and leatherleaf ferns before they are decorated with a thin coating of FloraLife® ForEver Green solution.
- Cut evergreens used in arrangements, corsages, boutonnieres, and wedding designs can also be dipped in FloraLife® ForEver Green solution. Simply pour the product into an open container and submerge the cut evergreens in it for 2 to 3 seconds.
- After you apply the product, allow 1 hour drying time at room temperature before decorating, putting into a cooler or putting stems into a vase.
- Sprayer bottle can be refilled with FloraLife® ForEver Green solution. No mixing required.
