

Finishing Touch vs. Crowning Glory®

Finishing Touch Spray

Systematic hydrating treatment, controls moisture loss

Nutrients absorbed into leaves and petals

Allows flowers to "breathe," continuing to take up water and flower food

Best For:

Floral arrangements in vases or floral foam

Whenever flowers have a water source

Application:

Light to medium cover; can bead on flower surface until dry

Crowning Glory®

Topical hydrating treatment

Adds luster to floral arrangements

Provides a waxy moisture barrier that holds in moisture

Best For:

Corsages, Wristlets, Boutonnieres

When flowers have a limited or no water source

Application:

Spray until covered; coats the flower

It is best to let both products dry before putting in the cooler.
