

### Loop Anchor

Easy connect anchor designed to fit around most commercial anchoring points.

### Forged Aluminium Karabiner

Our industrial grade, certified aluminium karabiner is both lightweight and strong, with a smooth "keylock" nose for easy attachment and removal.

### Aluminium Cam Buckle

The easiest straps adjustment mechanism returns, but with a stronger and lighter aluminium body.

### Connector Loop

Add huge exercise variety by connecting the handles and raising them to perform hanging exercises.

### Non-Slip Hand Grip

Naturally anti-bacterial rubber handles provide a comfortable non-slip surface for better grip.

Model number	TRQ-STRAPS-BLUE
Package Dimensions	5.5" x 5.1" x 4.3" (140 mm x 130 mm x 110 mm)
Weight	4.4 lbs (2.0 kg)
Anchor length (Specific to Torque)	26.4 in (70 cm)
Warranty	1 year on materials and workmanship

### NOTES

- The Loop Anchors are specifically designed to be the correct length for Torque Fitness X-Series Products.
- The Strap assemblies can be attached to a single anchor point on a system or independently and adjusted for variable widths.
- Torque Pro Suspension Straps should only be used on a system that is properly anchored to floor and/or wall.

### SINGLE ANCHOR POINT

- The Loop Anchors can each be attached to a single anchor point to be used like traditional suspension training straps.
- Torque's X-Create Systems have an anchor point on each upright and we recommend one Pro Suspension Strap Set for each.

### DUAL ANCHOR POINT

- Each Loop Anchor can be attached independently to a cross-bar.
- This split anchor method allows you to use the Pro Suspension Strap system in a variety of ways, perform more exercises, and have two people per set of straps if needed for group training.
- This method can be used on any Torque X-Rack, X-Siege, X-Lab, or X-Create System by attaching them to the pull-up bars or Monkey Bar Crosses.
