# squiggle cutters
custom cutter guide

the process

1 make a sketch, digital file or write a description of what you'd like your custom cutter to look like!

2 purchase a custom cutter in our online shop + upload your file(s).

3 within 3 days, you'll receive an email with a digital proof of your design - you'll either approve or make adjustments! our custom cutters include one round of design + one round of adjustments!

4 once you approve your custom cutter design, your custom cutter will be printed and shipped within 10 days.

we are here if you have any questions - you can email us at squigglecutters@gmail.com!

complex cutter pricing

please note that complex cutters start at $35 - upon reviewing
your design, we will communicate with you if your design is too
complex / what options are available for your cutter! extremely
complex designs sometimes require resin printing instead.

collection pricing

if you order five or more custom cutter designs at once, use code
COLLECTION at checkout for 20% off your custom cutters!

design details

you can submit your custom cutter design the following ways

1   a sketch - you can take a picture of a physical sketch or send a digital drawing

2   a procreate design (.psd)

3   a vector file (.ai, .dxf, or svg)

4   a written description of your cutter

imprint lines are in increments of .4mm / 0.01575" thickness (printer limitation)

custom cutters can be up to 76mm / 3" large. we can print larger cutters as well!

vector-based art is preferred - .ai or .svg. this will allow me to create a cutter based on your exact shape! cutters made from sketches/drawings will be close to your sketch but not an exact match.

all custom cutters include one round of design + one round of edits. additional edits may result in additional design fees.
