To Whom It May Concern:

I am writing this letter to give my highest recommendation for Service Wing Organic Solutions, LLC in Tulsa, Oklahoma. Last year they installed an Anolyte Generator for the Pawnee County Emergency Management. This system produces bulk quantities of Hypochlorous Acid which is an EPA approved disinfectant used for the fight against COVID-19.

Through a partnership, with the Pawnee County Emergency Management, we were able to obtain Hypochlorous Acid throughout the year at no cost. Using hydrostatic sprayers, we used it to sanitize our entire campus throughout the entirety of our school year. We used it to disinfect our buses, cafeteria, classrooms, and all high touch areas on a daily basis.

We were able to have in-person learning throughout the entirety of the school year. We only had two cases of COVID-19 directly in the school and those resulted in fewer than 10 total quarantines. We believe that having the Hypochlorous Acid readily and affordably available, benefitted us tremendously. Again, I highly recommend this as an effective option in the fight against COVID-19.

Sincerely,

Derrick S. Meador, Superintendent
