CORRECTIVE TREATMENTS

Be the best version of yourself with our next-level face and body treatments.

SKIN NEEDLING

Collagen induction therapy or micro-needling is a procedure designed to enhance + improve skin complexion via activation of the skin's natural regenerative processes which stimulates collagen synthesis. With expert precision, technique and timing, medical micro-needling triggers growth factors for building new collagen. Very tiny needles are used to penetrate the top layer of the skin vertically causing localised and controlled wound healing without substantially affecting the structure of the epidermis. The creation of controlled micro-channels in the skin instigates the regeneration of skin cells via a natural process of healing. Awakening the fibroblast that lies within the deeper layers of the skin, healthy collagen is naturally produced. The gentle stimulus provided by medical micro-needling is considered far more effective than many other more invasive and expensive treatments. It is a quick + easy technique with little downtime. After a course of treatments, skin structure is visibly revitalised, rejuvenated, replenished, and regenerated. Safe for most skins and can be performed at any time of the year.

LASER SKIN REJUVENATION

Clarity laser skin rejuvenation is a proven technology that can treat conditions such as pigmentation, sun damage and broken capillaries. The result is a clearer, more even, vibrant skin tone and firmer skin. This dual-wavelength laser can be used safely for a wide range of skin colours and skin conditions. It is also non-ablative, which means it's gentler and less invasive. This keeps surrounding tissue healthy and intact and helps to ensure minimal recovery times.

COSMETIC INJECTABLES + DERMAL FILLERS

Dermal filler treatments are comfortable, natural-looking, quick, and convenient. Made of biocompatible products that are completely safe, they've been used for many years already in Australia and around the world. You are in expert hands with industry leaders Dr Peter Bakaric and his professional team working directly with you to achieve the results you're looking for. They can treat your lines and wrinkles – frown lines, crow's feet, under-eye lines and more. They're also skilled in minimising furrows and depressions, adding volume to your cheeks, chin and jawline or helping you achieve fuller lips. For more information on pricing or treatments to give you the best results, just ask.

LED LIGHT THERAPY

LED light therapy can help to reverse the effects of ageing and restore your appearance. It works by stimulating your skin's natural production of collagen and elastin. HEALITE II is the therapeutic use of LED energy to enhance the body's natural cellular recovery, improving healing times, relieving pain, controlling active acne, promoting skin rejuvenation and more. The safe, pain-free and non-invasive treatment delivers concentrated energy deep into your tissue affecting your body at a cellular level. Your skin therapist can use Healite II as a standalone therapy or as an adjunctive enhancement of recovery with almost any procedure.
