- **Projection Direction button:** Press to rotate projection 180°.
- **Focus Wheel:** Use the Focus wheel to focus the projected image.

Time/Outdoor Temperature Projection: The projection will alternate between time and outdoor temperature every 5 seconds. **This is not adjustable.**

Note:

- On AC power the projection will be on constantly and alternate between time and outdoor temperature (unless turned to OFF).
- Using battery power, the projection and backlight will come on for 10 seconds when **SNOOZE/LIGHT** is pressed.

Position Outdoor Sensor

- Mount the outdoor sensor on a North-facing wall or in any well shaded area. Under an eave or deck rail is preferred.
- The maximum transmitting range to the atomic projection alarm is over 300-feet (91 meters) in open air, not including walls.

Search for Outdoor Sensor

- Hold the **+/TEMP** button for 3 seconds to search for the outdoor sensor .

Position Projection Alarm

- The projection alarm has a wide base to sit on a desk or table.
- Choose a location 6 feet or more from electronics such as cordless phones, wireless gaming systems, televisions, microwaves, routers, baby monitors, etc., which can prevent signal reception.
- Position near an exterior wall that faces Ft. Collins Colorado for WWVB time signal reception.
- Place within 300 ft. (91 meters) of the outdoor sensor.
- Obstacles such as walls, windows, stucco, concrete and large metal objects can reduce the range.
- Be aware of electrical wires and plumbing within a wall. This will interfere with RF (radio frequency) signal reception.

Low Battery Icon

When the low battery icon is displayed it warns to replace batteries.

- If the icon is displayed in Outdoor Temperature section, replace batteries in the outdoor sensor.

- If the icon is displayed in Indoor Temperature section, replace batteries in the projection alarm.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause

harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device must not be co-located or operating in conjunction with any other antenna or transmitter.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Caution!

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.
