• GAS HEATING •
DOMESTIC CATALOG

. BENEFITS OF GAS HEATING.

SMOKE FREE

No lingering smell and easier on the respiratory system.

ENVIRONMENTALLY FRIENDLY

Gas flame produces up to 99% less emissions than wood burning.

FLAME CONTROL

Easily accessible knob puts you in control of the flame size and heat output

NO ASH TO CLEAN UP

Enjoy beautiful LavaGlass® or FireStone™ filler instead of wood or coal, and the mess it leaves behind.

. IGNITION TYPES.

MATCH

The simplest ignition system; turn on the gas valve and light the burner using a long fireplace match.

PIEZO

Piezo ignition uses an electric charge from a response to high pressure accumulated in PZT ceramic material.

lead + zirconium + titanate
 $Pb[Zr(x)Ti(1-x)]O_3$

PULSE

This battery powered igniter creates a spark with no electrical supply needed.

. BTU.

BRITISH THERMAL UNITS

THE ENERGY NEEDED TO HEAT OR COOL ONE POUND OF WATER BY 1°F

IN GAS HEATING

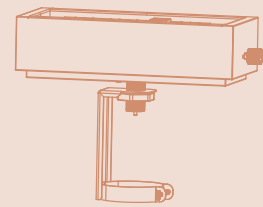

THE HIGHER BTU'S THE MORE HEAT AND FLAME THE FIRE PIT WILL GENERATE

GAS HEATING BTU

• PRODUCT TYPES •

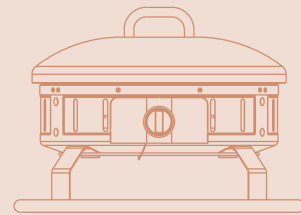

While all of our gas heating products add warmth and light to your outdoor space, the correct placement ensures that expectations are met.

FIRE BOWLS *for umbrella holes*

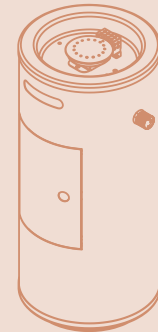

With simple assembly and installation, our tabletop umbrella hole fire bowls are a great enhancement for any outdoor patio table, with an umbrella hole.

Each umbrella hole fire bowl connection fits a standard umbrella hole, connecting to a propane tank beneath the table.

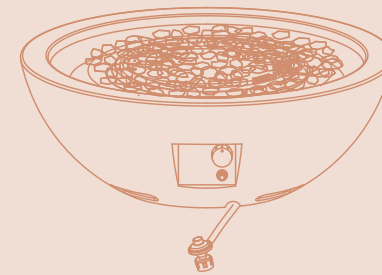

PORTABLE FIRE PIT

Portable gas fire pits are ready to go whenever you are. Bring it along to your favorite beach spot, RV park, camping, or set up to relax in your own backyard.

FIRE COLUMNS

Fire columns are a beautiful way to add structure to an outside entry way or pool area. Our fire columns come in a variety of styles to complement outdoor living spaces, pairing well as a secondary heat and light source to a fire table or fire pit.

FIRE PIT

Fire pits act as a warming centerpiece for outdoor seating areas. With low smoke and adjustable heat output, they can be enjoyed comfortably for hours.

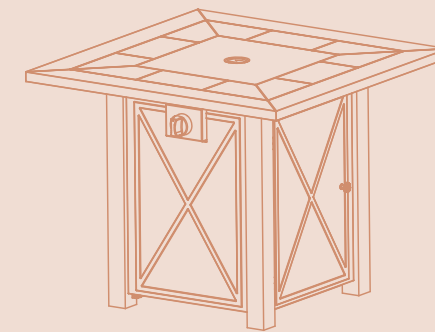

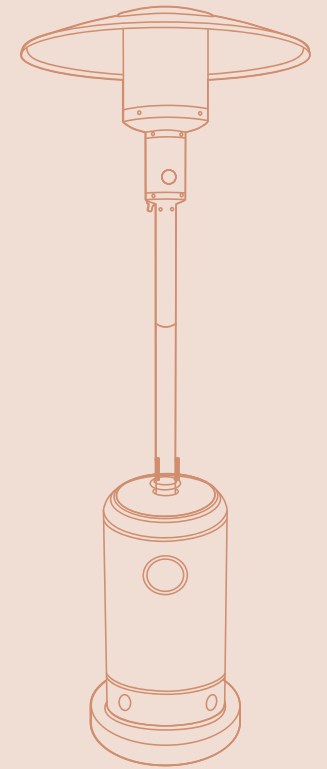

TABLE HEIGHT FIRE PIT

Table height fire pits have all the benefits of a fire pit with the added bonus of a rim to rest your refreshments. Our higher end fire pits include a burner lid that maximizes its use with a usable surface when not lit.

PATIO HEATER

Patio heaters are the go to for higher heat output, and an optimal heating source around outdoor dining tables.

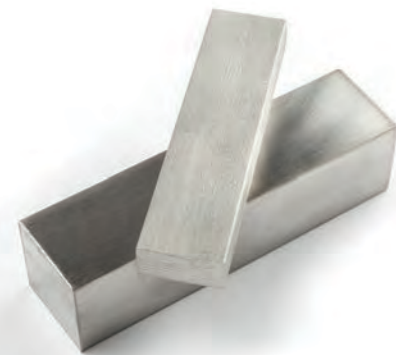

• MATERIALS •

BOND

POWDER COATED STEEL

Our powder coated steel is much more heat resistant than painted steel. It also is more scratch and rust resistant than painted steel. The powder coated finish is versatile and can be colorized to match many other surfaces

STAINLESS STEEL

Stainless steel is the most corrosion-resistant kind of steel. The raw finish appeals to a wide variety of consumers and is found in many home accents and appliances.

ENVIROSTONE®

Envirostone® finish is made with durable inorganic materials that can emulate virtually any natural surface, at a fraction of the cost and weight of natural materials.

- FIRE-PROOF AND HEAT RESISTANT
- PROCOAT® UV PROTECTION
- LIGHT WEIGHT

• MATERIALS •

FILLERS

LavaGlass® provides a modern look for gas fire products. Each of our round cut fire glass pieces goes through a tempering, tumbling and polishing process to ensure product safety and longevity.

firestones™

Firestones™ can be used as a decorative addition on top of your existing lava rocks, or to replace all lava rock filler completely within your gas heating unit.

lava rocks

Due to their natural formation, lava rocks can withstand extreme temperatures without crumbling or becoming damaged. They can be added into any outdoor gas heating unit on their own or mixed with other decorative

firespheres™

Use Firespheres™ in your gas heating unit to add style in addition to your existing gas firebowl filler.

BOND

ROXBURY™

10" UMBRELLA HOLE TABLETOP FIREBOWL

The Roxbury™ Umbrella Hole Tabletop Firebowl creates a warm and inviting atmosphere outdoors. The unique design allows you to attach the firebowl through the existing umbrella hole on your patio table, while the propane tank safely sits underneath. The attractive weathered-bronze finish beautifully compliments any outdoor setting, as the flame dances across a bed of luminous Amber Sunset® LavaGlass®.

BOND

SARA™

14" UMBRELLA HOLE TABLETOP FIREBOWL

Transform your ordinary umbrella table into a vision of luxury and warmth. The Sara™ Umbrella Hole Tabletop Firebowl creates an inviting atmosphere for guests on your patio. The design allows you to connect the firebowl through an existing umbrella hole in your wicker, wood, glass or wrought iron patio tables. Your guests will take pleasure in the 15,000 BTUs of heat for the trivia contest or while enjoying their favorite after dinner beverages.

TABLE HEIGHT GAS
FIRE PITS

Multi-use with a boost in heat

Bond's narrow rim, table height gas fire pits feature a larger firebox and burner for more heat. The included burner lid provides a usable surface when the pit is cooled.

- ✓ 4.5" rim
- ✓ Larger burner gives more heat
- ✓ Converts to a usable surface with burner lid
- ✓ In-unit tank storage

A steel burner lid turns the fire pit into a larger surface when unlit and cooled.

Tank is conveniently stored in the unit.

TABLE HEIGHT GAS
FIRE PITS

A thinner rim means a larger firebox and burner, resulting in a boost in heat.

BOND

WOODLEAF™

28" GAS FIRE PIT

PADDOCK LANE™

28" GAS FIRE PIT

Inspired by the heartland of America, the Paddock Lane™ Gas Fire Pit is meant for the entire family to enjoy. It adds the heat needed to linger longer outside with its 50,000 BTUs of heat. The included lava rocks disperse heat and create a glowing field of embers. Add the lid, and the steel fire table converts to an outdoor surface for extra serving space or a game of chess.

RAPID INDUCTION

AREA HEATER®

Our Rapid Induction Heater has a patented induction system, including an oversized glass cylinder, which allows for a larger flame to reach maximum heat output. The dual layer heat screens double the heat yield compared to a traditional construction. Finally, the secondary air inlet at the base pushes air into the heater body, providing increased combustion. Increased combustion equals a higher heat generation.
